Batch Adding & Promoting Students:

Batches can be added newly when the new Admission starts by using create a new batch.

Promotion of batches is an essential activity when it comes to academic management software. After the Current Term/Semester ends we need to update the batches to their upcoming term.

An academic term (or simply term) is a portion of an academic year, the time during which an educational institution holds classes. Mostly the programs/courses offered by the colleges will be split into Terms/Semesters. Assessments and Subjects will be assigned for each semester.

After the current semester ends, we need to update to the next semester for that we need **batch promotion**. So the batch and students will be promoted to next term.

Outcome-Based Education(OBE) is purely learner-centric and the whole experience of education rests on the ability of students to learn.

Not all students learn the same way and at the same pace. So instead of providing a standardized model, Outcome-Based Education accepts the diversity in the classroom and uses the element of continuous evaluation to make sure that the student does achieve the desired outcome at the end of education.
