### SECTION – C

Answer this question **compulsory** :

(1×15=15)

12. In one public sector undertaking with a chequered past, a line manager was appointed as the chief of personnel, within a year after taking up the assignment, he had to sign a wage agreement with the worker's union. The union at that time was dominated by non-technical staff. The union's charter of demands favoured the interests of the dominant member's groups. It asked for a significant revision in gardener's pay, but was not equally vocal in pressing for the increase in the pay scales of the workers in certain technical grades. The management conceded these demands because the union co-operated with them in keeping the burden of the pay revision well within the guidelines of Bureau of public enterprises (BPE).

Once the agreement was signed and communicated to the employees/members by the management and the union respectively, there was commotion among the technical employees. They walked out of the union and formed a separate technical staff union. They marched round the company premises holding the placards which read "Here grass cutters get more than the gas cutters". In the Engineering assembly unit till the pay revision occurred, welding was a highly related job. But not any longer.

#### Questions :

- 1) Was the action of union management justified and why ?
  - 2) Forming a separate union was both right and wrong. Explain.
  - 3) What are the legal implications of forming a separate union ?
  - 4) If you were in place of management, what factors would you like to consider before finalizing the wages ?

an appraisal system that catered to employees across different areas was not a simple task. The company held its monthly review meetings at which all the departmental heads discuss their current problems and future strategies. These meetings provided a forum for the managers in various departments to interact.

During one such meeting, the CEO emphasized the importance of changing the appraisal system to sustain in a highly competitive industry, it needed to appraise its employees effectively so that they would put in their best efforts. He felt that HR department must change its functioning to more strategic functions like resource planning, organization planning etc. apart from the traditional functions like recruitment, selection etc. and the new initiative was proposed in a meeting. For the effective implementation of these initiatives HR manager suggested that

- The company need to change the base of its variable pay incentives.
- The processes in their operations had to be standardized and so the HR department had to play a vital role in training incentive plan, etc., The HR goals had to be in congruence with organizational goals so that performance management could be effectively designed.
- The management had to be flattened and a culture of empowerment brought in so that it could change the corporate culture.
- The employees had to be made more competitive and individual goals aligned with organizational goals.
- The HR department had to play an important role in re-engineering the firm, as it had to create the base for all the staff and development activities.
- The promotion system had to emphasize on internal hiring so that employees would get the opportunity to apply for the job of their choice. This would also encourage the employees to make themselves marketable and overcome their shortcomings so as to qualify for particular vacant positions.

The CEO asked all the departmental heads to go through the above recommendations and suggest any changes.
