The objective of the Program:

Plantation of Plants and Trees aids in making the environment better. It purifies the air, conserves water, helps in climate control, preserves soil and benefits the overall environment in several other ways. On 8th of December 2023 from Desalites Nature Club in association with Disha scheduled Plantation Day to create awareness among the young minds about the invaluable resource on our planet-plants and trees. The volunteers explained the details about the process of sowing the seeds, the various phases undergone in becoming plants and also about importance about air, sunlight, water and soil in the plant growth and also guided everyone well to the correct way to plant the saplings as well as how to taking care of the saplings after plantation. Students from various Classes were collected Saplings to plant around their home town.

The outcome of the program:

The purpose of observing the plantation day is to make people aware of the importance of planting trees and to assist them in doing so. Planting saplings to invest in the future is a common practice on tree plantation days.
