Session summary:

I am Vidya.N

St Francis de sales college hebbagodi

I am a proud NSS Volunteer and grateful to be a part of ENFOLD in creating awareness among the people.

I am at this moment reporting on the training session conducted for our community stakeholders in Empowering youths and creating a safer neighborhood in case of sexual abuse.

We concentrated on the people who come in contact with many people and children of our society.

After introducing the topic, we started interacting with them by questioning them, 'What is Abuse?' later, we brought awareness among them that Abuse does not include only rape. There are different types of abuse and sexual abuse, too.

As the abuse or discrimination in our society starts from the Birth of a child, we appeal to people to stop "Gender Discrimination" and start "Gender Equity." Not only based on Gender, we should even accept the child as it is by not judging its skin tone, size, talents, height, etc., which can hinder its mental growth. We should accept our "Body image" and let no one affect our self-esteem" was

Edit with WPS Office

our intention.

Being safe from abuse starts with having education about ourselves. Hence, we enlightened our stakeholders on how "Personal Safety and Personal Body Education" can prevent sexual abuse, and this begins when the child starts learning nonverbal language.

These were about the preventive measures before Sexual Abuse. Then, we started with the steps to be taken in case of "Child Sexual Abuse." Helpline no. 1098, The POCSO Act (Protection of Children from sexual offenses Act) of the Government of India, their working and provisions under the law.

In today's society, women's employment is also a matter of rights, but women are being abused in the workplace. The Government of India has initiated the "Prevention of Sexual Harassment at Workplace."

We guided them to opt for the "BAL SURAKSHA" app to learn about the things that can be taught to a child of a specific age; STHREE SURAKSHA and SURAKSHITH apps introduced by ENFOLD Trust to spread knowledge and awareness among people widely.

After the session, coffee and biscuits were facilitated to our stakeholders.

#### Session feedback:

Our stakeholders were interactive and good listeners, too. They shared some of the incidents that they came across. We were supported to initiate some more sessions regarding the topic to the people gathered by them.
