One such HLL is the C Language.● History of C The history of C starts with a language called BCPL (Beginners Combined Programming Language) developed by Martin Richards. In 1970, Mr. Ken Thompson, a System Engineer at AT & T Bell Laboratories, USA, wrote an earlier version of

	<p>C language for the UNIX operating system.</p> <ul style="list-style-type: none"> ● About ANSI C Standard For many years, the de facto standard for implementing the language has been the original C Reference Manual by Kernighan and Ritchie published in 1978.
Module 2 (Complete syllabus)	Classes & Objects – I: Class Specification, Class Objects, Scope resolution operator, Access members, Defining member functions, Data hiding, Constructors, Destructors, Parameterized constructors, Static data members, Functions.
Objectives of the Course	<ul style="list-style-type: none"> ● C is a general-purpose computer programming language for system administration, network programming, and embedded software. It has several features that make it desirable for these applications: C program syntax is easy to learn and read; this makes debugging code more accessible and faster. ● C is the programming language that is used to write applications for Apple's iOS and OS X operating systems. The Objective-C programming language is based on C, but it adds support for object-oriented programming. All Objective-C programming is done with the Foundation framework.
Outcome of the Course	<ul style="list-style-type: none"> ● To learn the coding outcomes that you can expect to see in children as they learn to code are problem-solving skills, creativity, algorithmic, sequential and computational thinking skills. ● Control the sequence of the program and give logical outputs. Implement strings in your C program. Store different data types in the same memory.
