Drawing is one of the fundamental elements of art, serving a variety of purposes for creativity. While it can be an art form in itself, it is also used by artists to explore ideas and concepts and to prepare for final artworks in another medium, like painting

Pencil drawing, drawing executed with an instrument composed of graphite enclosed in a wood casing and intended either as a sketch for a more elaborate work in another medium, an exercise in visual expression, or a finished work. The cylindrical graphite pencil, because of its usefulness in easily producing linear gray-black strokes, became the successor of the older, metallic drawing stylus, with which late medieval and Renaissance artists and tradesmen sketched or wrote on paper, parchment, or wood.
