Place of visit/ details of Industrial visit place:	NA
Event Coordinator	Prof. Benet Rajadurai & Research Cell Members.

About The Session:

On 4th February 2023, Saturday, the Research and IP Cell of St. Francis De Sales College, Bangalore in Collaboration with Department of Sociology, St. Francis De Sales College, Aalo, Arunachal Pradesh organized One Day International Webinar On "Consequences of Cloned Journal Publications". The resource person for this Webinar was **Dr. ANDI ASRIFAN, Indonesia**. The rapid growth of fake and predatory journals has seriously threatened the academic community. Promotion in academics, incentives for publication, and the pressure stemming from the "publish or perish" policy are some important causes that lead authors to publish in fake and predatory journals. However, there is a difference between a predatory journal and a clone or a cloned journal. While predatory journals use a fake title in their publication, a cloned journal uses the same title as a reputed journal and shows the same International Standard Serial Number (ISSN) on its website. Cloned journals develop a mirror image of reputed journals and attract more articles than predatory journals. The menace of predatory and cloned journals has sharply risen post-pandemic. Compared to predatory journals, it is difficult to identify cloned journals. Another term used for cloned journals is "hijacked journals". Fake journals and even fake conferences have penetrated academic integrity.

Dr. Andi Asrifan, clearly explained the current issue in a systematic way. More than **1234** participants from Kanyakumari to Kashmir & **20** Participants from Other Countries were participated through Google meet and you tube live. The participants came to know many things about the consequences of fake and coned publication and how to Identify them by various authentic sources.
