### About The Session:

On 28<sup>th</sup> January 2023, Saturday, the Research and IP Cell of St. Francis De Sales College, Bangalore organized One Day National Webinar On "Detecting Fake and Cloned Journals". The resource person for this seminar was **Dr. Saidna Zulfiqar Bin Tahir**, Assistant Professor, Director of the Research and Community Service Institution, Universitas Iqra Buru, Maluku, Indonesia. Contemporary scholarly scientific research and publishing are characterized by many journals, the fast tempo of publication, and the competitiveness of the funding process. These factors, in conjunction with the pervasive adoption of communication via social media platforms in academia, have given rise to a demand for new venues for scholars and scientists to collaborate on, publicize, share, and quantify the impact of their published works. Because medical librarians are an integral part of the research and scholarly communication process, the popularity of these new platforms calls for a basic familiarity with their features that an informed library professional can provide. Nearly about 1000 participants were participated in National and International level through Google meet and you tube live. The participants came to know many things about the pathway to research gate and its importance in research.
