				Write down the details of Java is an object-oriented language, and there is a growing consensus in the computing world, both educational and industrial, that computer programming should be thought of primarily in object-oriented terms. In the early days of computers, a computer was a standalone device into which you fed in data, it did some calculations and gave you some output. The emphasis then was on trying to give some structure to the instructions which made the computer do the calculations, so that the instructions as a whole could be broken down into smaller self-contained parts. Being able to divide a program into parts like this made it easier to understand, and the job of programming was made easier if you planned what you were doing by breaking the task down into parts. This was termed "structured programming". Structured programming was seen as the program as one structured entity operating on the data as another, hence the phrase that was used to describe it "Program=Algorithm+Data Structure" ("algorithm" is defined in the on-line dictionary of computer terms as "A detailed sequence of actions to perform to accomplish some task"). In contrast, object-oriented programming sees computing as a large number of entities, each of which has both its own data to hold and instructions to follow, interacting with each other.

SL NO	COURSE CODE	COURSE NAME	CO CODE	COURSE OUTCOMES
1	AEL301	Critical Theory-I	CO1	The students will learn about the major theoretical turns in the 20th century; they will learn to make a distinction between literary criticism and literary theory.
2	AEL303	Literary and Cultural Studies-I	CO1	The students will learn to study popular cultural texts, non-canonical texts and sub-cultural texts; they will learn to look at these texts as part of a complex web of historical conditions and cultural patterns.
3	AEL304	Modern Linguistics-I	CO1	Introduce students to the concept of language and linguistics, understand language variation and contribution of Ferdinand de Saussure, develop linguistic competence
4	AEL302	Postcolonial Studies-I	CO1	To acquaint students with the basic terminologies of postcolonial studies as a major current discipline. To familiarize them with the history of the development of postcolonial theory and its present relevance. To enable them to critique literary texts within the theoretical frames of postcolonial studies.
5	AEL305	Teaching English Language and Literature-I	CO1	To help students develop an in depth perspective of English Language Teaching Scenario in India, Equip students with literary competence
6	AEL101	British Literature-I	CO4	The students will learn to locate British literary texts within socio-cultural and political contexts
7	AEL105	Communicative English-I	CO1	To teach students four language skills, phonetics and modern English grammar and train students in language functions.
8	AEL106	European Classics Revisited-I	CO1	To help students read texts in the wider contexts of European history. To encourage students to develop new and original methods of interpretation even while surveying traditional texts.
9	AEL103	Gender Studies-I	CO1	To introduce students to the multi-accented inter-disciplinary frames of gender. To show how gender operates in the lives of individuals, and how it
