**Conducted By:** CSA, St. Francis De Sales College  
**Attended By:** 60  
**Organized By:** CSA, St. Francis De Sales College

As the world's population continues to grow, so does the amount of garbage that people produce. On-the-go lifestyles require easily disposable products, such as soda cans or bottles of water. Still, the accumulation of these products has led to increasing amounts of plastic pollution around the world. As plastic is composed of major toxic pollutants, it has the potential to cause significant harm to the environment in the form of air, water, and land pollution.

Simply put, plastic pollution occurs when plastic has gathered in an area and has begun to negatively impact the natural environment and create problems for plants, wildlife, and even the human population. Often this includes killing plant life and posing dangers to local animals. Plastic is an incredibly useful material, but it is also made from toxic compounds known to cause illness, and since it is meant for durability, it is not biodegradable

To avoid the dangers on environment, air and water, Centre for Social Action has conducted one awareness program on "Say No to Plastics" on 23/10/2019 for school students. One of the biggest menaces of this modern age is plastic. We live in the age of 'use and throw'. As it is easy and inexpensive to manufacture and offers versatile use, plastic is used almost everywhere. However, it is also creating a huge amount of waste. Landfills, oceans, mountains and valleys have become garbage dumps with overwhelming amounts of plastic. It is slowly damaging our eco-system and the environment around us. Plastic takes over 1000 years to disintegrate and decompose completely. Besides, it releases harmful chemicals, which seep into water and soil. Gradually, it is ending up in oceans and landfills, endangering several species. Animals around the world are dying due to plastic pollution, and its high time we do something to stop this ever-growing menace.

## Say 'No' to Plastics

In order to protect our planet from plastic pollution, social awareness program is conducted about the harmful effects of plastic. And awareness starts by informing and educating our children. It is important to teach children about the importance of saying 'No' to plastics.

Children must be discouraged from using plastic bags and how it can block pipes and ultimately end up in seas and oceans, eventually endangering wildlife. At the same time, it is also necessary to find alternatives to plastic bags. Following are some ways to curb this problem.

- Use paper bags instead of plastic ones
- Always carry a biodegradable cloth or paper bags to the market
- Start using nylon or jute bags regularly
- Spread awareness among local retailers about the harmful effects of plastic
- Encourage manufacturing of paper bags by donating old newspapers and magazines to small scale bag manufacturers

Once we start practicing these eco-friendly habits at home and stop using plastic completely, children will also follow in our footsteps.

These activities are not just one-time events that we do and forget. Our teachers motivate students to practice social awareness in every aspect of their life. We create an ideal environment to nurture and grow young minds. Here, children are not only encouraged to do well in academics but learn to become socially-responsible citizens.
