## REPORT

To have a proficient and well-balanced team, harmony and communication are key factors that must be cultivated. This back-to-back drawing game is a great tool for just that. It heavily relies on the participants to adequately get information across from one another and it provides the means and practice to remove misunderstandings in a working environment.

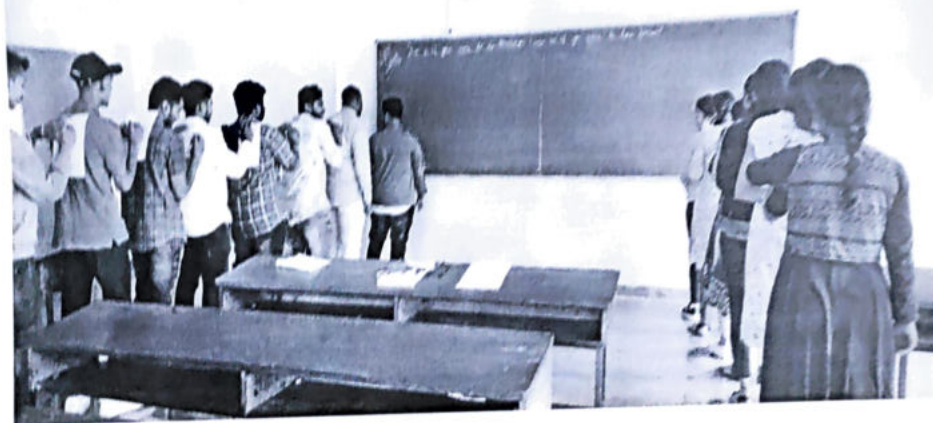

The activity was conducted by Dr. Maria Priya P on 26<sup>th</sup> Nov 2021 as a part of HR activity for students. The back-to-back drawing communication exercise will get the groups and couples working together, talking, and thinking about how they communicate. The speaker will describe an image for the listener to draw, but the listener cannot speak. Neither person can see the other's paper.

The game highlights the importance of patience, the ability to listen well to what others have to say, and how one may be able to overcome a blockage in non-verbal communication. And, as a plus, this game will definitely fill the room with laughter.

Next the team discussed the exercise and reviewed the following questions:

- How well did the first person describe the shape to their partner?
- How well did the second person understand the instructions and how close were they to duplicating the actual shape of the picture?
- Did they discover any problems with the sending or receiving parts of communication and how did they overcome this?
