**Faculty Development Program
on
ERP Software and its Uses
Date:
28.06.2018 to 29.06.2018**

Organised by
IQAC
Venue: Conference Hall, SFS College

About the College
St. Francis de Sales is managed by the missionaries of St. Francis de Sales (MSFS) of South West India province who firmly believe that 'the education of the heart is the heart of education' hailed by the founder Fr. Peter Marie Mermier. The MSFS Fathers have nearly two centuries of experience in imparting quality higher education in every continent of the world. With the aim of imparting higher collegiate education and, thereby, provide meritorious service to the Indian society, St. Francis De Sales College focuses on the academic excellence of the student community of the college. The College was graded "A" grade by the NAAC team for its excellent educational track as well as infrastructure and quality in May 2015 and has received the permanent affiliation to the Bangalore University.

About the IQAC:
Internal Quality Assurance Cell (IQAC) of St. Francis de Sales College functions with a major purpose to maintain long-term quality standards. The prime task of the IQAC is to develop a system for conscious, consistent and catalytic improvement in the performance of the College and to channelize the efforts and measures of the institution towards academic excellence.

About the FDP:
Enterprise Resource Planning is usually a business management software which any organisation can use to collect, store, manage and interpret data for various activities. ERP provides an integrated and continuously updated view of core business processes using common databases managed by a database management system. In the present scenario using an ERP becomes unavoidable for any institution and it is also important for the staff of the institutions to be educated on ERP software. The Faculty Development Program on "Orientation on ERP" will do the same by educating the staff on what is an ERP software and what kind of software is being used in the institution.

Resource Person   : Mr. Suman Nandy
                          Director,
                          Campus Technology

Schedule:

28.06.2018
Inauguration
ERP – An Introduction

29.06.2018
Campus Technologies – New way of ERP
Valediction

Time:
10.00 am to 12.30 pm

Convenor:
Prof. Maya Mathew
IQAC Coordinator

A report on Faculty Development Program on
"ERP Software and its Uses"
Date: 28.06.2018 to 29.06.2018

The FDP "ERP Software and its Uses" was conducted for the non-teaching staff. It was conducted in the seminar Hall of our college and twenty members attended this program. The FDP started with the College Anthem followed by the prayer. The IQAC Coordinator, welcomed the guest speaker and the faculty members. She, then welcomed the guest to take over the session.

The resource person was Mr. Suman Nandy, Director, Campus Technology. He spoke on the importance of ERP Softwares to institutions and how their software will cater to the needs of the colleges. He then said that colleges often look for solutions that help them automate key functions such as biometric access, student smart cards, attendance management, etc. He then explained what is ERP software and why it has become mandatory in today's world.

An ERP software will be customised to the needs of the college and it will respond to the modules of Administration, Admission, Examination, Student Support, Staff support and so on so that the management can function in an effective way. He also explained that with these softwares there can be decentralisation of the process and still the control can be with the management. He then gave a small introduction to his ERP Software – Campus Technologies.

On the second day, he spoke in detail about their software. He explained that the Campus Technology suite helps colleges gain better control over day to day operations while offering protection from fraud at a basic level. Campus Technology is a college management software that helps the management to efficiently keep the institution running without any hassle. He proceeded to inform all that their software is user friendly. From his perspective, this suite is used by budget conscious colleges that seek to adopt a basic level of automation.
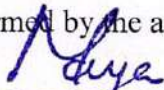

He told that their application is planned for aiding the students of an organization about details on the courses, subjects, classes, assignments, grades and time-table. The administrator would maintain the accounts of the pupil and staff, prepares the time-table and upload the current information regarding the campus. The main problem projected is that the pupil's particulars are reported manually in distinct records, which is a laborious job. Handling and updating these records manually increase the chances of mistakes. It takes a lot of time and needs many employees to accomplish the task. It even lacks security and disability to produce various types of reports.

In order to solve these problems, a new system has been created, that attempts to operate the whole procedure considering the database integration approach. This is where the Campus Technology plays a significant role of making the work easier for the management. He then informed about various features that the software includes like, a single integrated application that automates all processes on the campus for better efficiency and lower costs, secure role based access – control who should see what information, rich feature set of modules covering – Admissions, Fees, Academics, Examinations, Library, Hostel and Payroll to name a few. Dynamic report dashboard – easily create or view different reports. It also provides automation of everyday functionalities like – Timetable, Attendance, Book Issue / Return, Dues Collection etc.

It also provides the Principal and Management more control over the operations of all the processes in the campus and facilitates better informed decisions. Students and staff can view their personal, financial and academic information using the smart card within the campus. Facilitates the academic departments to configure the academic calendar and the lesson plan that helps them monitor academic progress during the entire term. Easily configurable to comply with the rules and regulations prescribed by the affiliated university regarding - admission process, attendance, internals, exam eligibility, course credits and eligibility, student promotion, etc. Information accessible online and calendar scheduling and collaborative features for connecting all stakeholders – via online, Email and SMS functions.

This software makes the admission process easier because the data entered in place are accessible to all people concerned with admissions. This saves a lot of time as well as makes the process less hectic. The installation of the software makes the operational task convenient in a highly effective way. This software system helps to keep watch on all tasks performed by the administrative staff. As the software can be accessed anytime, every person

Declaration

I hereby declare that the following is the list of faculties participating in the FDP - "ERP Software and its Uses" organised by the institution between 28.06.2018 and 29.06.2018.

S.NO	Faculty Name
1	Mrs. C. Vimala
2	Mrs. Indrani M
3	Mrs. Siji John
4	Mr. Nanjappa R
5	Mr. Siddaraju S
6	Mrs. Dheenadhayalini S
7	Mrs. Aruna Mary
8	Mrs. Anthonyamma
9	Ms. Janita D'Souza
10	Mr. Bipin Babu
11	Mr. John D'Souza
12	Mr. Sabastin F
13	Mrs. Sandra Neville
14	Ms. S. Manju
15	Mrs. Jessy Binu
16	Mrs. Joseph Richard
17	Mrs. Jancy T. J.
18	Mr. Raju
