## A FRANSALIAN INSTITUTE OF HIGHER LEARNING

### FIELD WORK -REPORT

Title	FIELD WORK
Date of Event	30/01/2023
Department/Association/Cell/Committee	Department of commerce - PG
Number of Participants	52
Target Audience	M.com and MA(ECONOMICS)Students

Place of visit/ details of Industrial Visit place	Karnataka Soap and Detergent Ltd.
Event Coordinator	Dr. Thanapackiam

#### The objective of the Program:

Industrial visit aims to provide opportunity for the students to explore the industrial operating environment. Generally, visits will give the chance to learn the practical things happening in the organisation.

Industrial visits serve as an excellent platform to learn for students pursuing higher education and they help in bridging the gap between mere classroom learning and the actual work conditions. The department of commerce have industrial visits as part of their curriculum to help to inculcate the practical workplace environment to the students and to render a holistic and realistic education to them.

#### Report:

On January 30, 2022, the department of commerce organised an industrial visit at Karnataka Soap and Detergent Ltd. The department had scheduled the visit well in advance. The necessary clearance to visit the manufacturing division has been obtained from the authorities. Students were eager to see the soap making division because they had been briefed in advance about the industrial visit.

Around 11 a.m. on January 30th, 50 students and two faculty members left the college premises and arrived at the factory at 12:30 p.m. public relations specialist Mr. Balakrishnan led us inside the facility for the industry. We had gathered in the seminar room. He provided a comprehensive history of the origin of Mysore sandal soap.

Electronics City P.O., Bengaluru - 560 100

Tel.: 080-27836065 / 27834611, Fax: 080-27832299, Email: principal@sfscollege.in  
www.sfscollege.in

He talked about the purchasing of raw materials and the manufacturing process. He discussed the products that rival companies had on the market. He did an excellent job of explaining how Mysore sandal soap differs from other goods. The pupils were also given an explanation of the components and the manufacturing process. Later, students were taken to the places around the sandal trees. Suddenly, a great smell filled the air.

Then, we were led to the manufacturing section, where the raw materials were processed, the soap's substance was manufactured, and the fragrance and flavours were added. Five different types of soaps were made, including 1. Mysore sandal millennium and 2. lavender soap. 3. soap with jasmine 4. The original sandal gold and Mysore sandal soap. Students were allowed to see the entire process and packing division too. Students enjoyed the visit and have experienced the real manufacturing process of soap making.

**The outcome of the program:**

The visit brought clarity to important management concepts and how these concepts are put into action. Students were allowed to ask questions related in their area of interest. Students were able to identify the process of procurement marketing strategies, promotion methods, logistics details etc. Industrial visit gives students a platform to enhance their interpersonal skills. Knowledge from practical perceptive of industry operations.
