--	---

Detailed report of the visit

Industrial visit is considered as one of the tactical methods of teaching. The main reason behind this- it lets students know things practically through interaction, working methods and employment practices. Moreover, it gives exposure from an academic point of view. Main aim of industrial visit is to provide an exposure to students about the practical working environment. They also provide students a good opportunity to gain full awareness about industrial practices. Through industrial visit students get awareness of new technologies. We know building relationships with companies always will always help to gain a good job in future.

Students of ST.FRANCIS DE SALES COLLEGE are assigned to have an industrial visit for the purpose of experiential learning and to encourage students voluntarily. The students were asked to visit any industry and to find out the various cost elements in the industry and to prepare a cost sheet and a report of the same. A group of 6 students had gone to Meenakshi Steel Traders, Hebbagodi.

The industrial visit thus gave the students an opportunity to see the various working processes which took place in Meenakshi Steel Traders and also gain some knowledge regarding various parts of products. Hence this visit ensures that students have some idea about how the industries are actually working in their fields.

This industrial visit was Informative event for all the students and also was very crucial for development of our practical skills and other activities of the industry. Students got the knowledge on different types of machines used and the accounting practices and also had an opportunity to research on it. hoping to get more chances further for our students to have such an informative & wonderful experience of visiting different industries.
