REPORT ON TRAINING ON SAP

Venue: Computer Lab 1 and Lab 2

Participants: Final year students enrolled for the program

Conducted by: IT Champs

Dates: 1/9/2018- 20/11/2018

The training was organized for final year students to help them with better placements. The trainers were from "IT CHAMPS". The training was conducted after regular college hours for the students who enrolled for the program. The SAP ERP is enterprise resource planning software helpful in real working environments. Business Processes included in SAP (Systems Applications and Products in Data Processing) ERP are Operations (Sales & Distribution, Materials Management, Production Planning, Logistics Execution, and Quality Management), Financials (Financial Accounting, Management Accounting, Financial Supply Chain Management), Human Capital Management (Training, Payroll, e- Recruiting) and Corporate Services (Travel Management, Environment, Health and Safety, and Real-Estate Management).

Students found the course really useful for their future endeavours. SAP is going to be very useful and has been the leader in ERP. Microsoft and Oracle are the only 2 software companies better than SAP (in terms of revenue). But with SAP Hana there is a good chance of SAP beating (or very closely competing) with Oracle. So they gave review that mastering this could help them with placements as well as practically applying it.
