Abstract: *The purpose of the research is to make review of users' preference between Facebook and Instagram. Social media networks compete with each other, and they make an effort to increase their number of users which at the same time trying to create engagement. The main objective of this study to analyze the purpose of using the selected social media. There are two social media sites in the study area that are Facebook and Instagram. The study used 50 respondents for the purpose to get Facebook on social media sites like Facebook and Instagram and analyses the purpose of using most Facebook and Instagram and how does it work. Identify the difficulties faced by users of social media it is safe or not, social media is helpful to any business development.*

Key words: *social media, Facebook, Instagram, image features, Users*

Introduction

Today, social media have been increasing used to connect with one another. Consumer news content and share information. In the United States above 70% of the public have used social media. Facebook and Instagram are among the hottest social media platforms across the global, with 2.32 billion monthly active users respectively. Facebook and Instagram is the best strategy for markets to effectively reach their audience let's take a look at the data to determine whether Facebook or Instagram or Both. The study used 50 respondents for the purpose to get feedback on social media sites. The main objective of this research study is analyze the purpose of using the selected social media and how it benefits to the audience, what are difficulties faced by the audience in selected social media. Social media dominance has increased dramatically over the past few years with popular social networking sites like Facebook, Instagram, Twitter, Snapchat, etc. leading the race. Social media usage has witnessed an unprecedented growth over the past decade, thanks to Facebook and Instagram which dominate

the social media ecosystem. Social media has seen a significant surge in active monthly users in the last two years and looking at the numbers, it's only increasing with no signs of going back, it's almost surprising to see how social media has evolved over the past decade. Today, social media dominance has reached such an extent even the remotest parts of the world have knew about Facebook and Instagram, and they are most likely using it every day. Facebook undoubtedly dominates the social media scene in terms of audience reach and engagement, but Instagram is good at making noise too. This article looks at the two popular social media sites and explains how they differ from each other.

The following are the objective of the study

1. To Analyses the purpose of using the selected social media.
2. To identify the difficulties faced by users.
3. To find the benefits of selected social media.

Methodology and tools

This study is a social media related research. Has been used convenient sampling method for this study. Sampling design means collecting the samples from respondent. Data has been collected from 50 respondents. People connect on Facebook and Instagram every day. Your small business ads can show up as people are exploring what they're interested in, so making a connection with your business is easy. You decide who sees your Facebook or Instagram ad. Narrow down your ad's audience by interests, gender or location and use ad targeting to find the people most likely to click.

Data Collection

The primary data were collected in Bangalore in the month of February 2022 by using the online forms filling by respondent. Data were collected by online forms that respondent fill the form by using google forms. Social media analytics is all about collecting data from social media platforms and leveraging that information to make better, more intentional decisions for your organization. Consulting your Facebook and Instagram analytics regularly helps you understand how to use these platforms as a part of your marketing strategy, so your organization can grow and thrive. More than 3.8 billion people across the world use social media platforms every day. It's crowded and it's competitive. Social media analytics are an invaluable resource in gauging customer's interests.

Review of Literature

Olivia G Stewart “The social media’s affordances in the classroom” First Published on October 12, Even though the use of social media in education is a now widely-studied topic, there still does not seem to be a consensus for what social media may afford students or how best to use them in the classroom. In this critical review of current literature, I discuss some of the most prominent qualitative studies that explore the use of social media in the classroom.

Rob Sanders “Instagram vs Facebook should you use one or both” Rob Sanders is a digital marketing veteran with over 20 years of experience. During that time, Rob has helped a wide range of companies utilize new and emerging technologies to increase sales and profitability. As founder of RSO Consulting, Rob has helps clients maximize their digital marketing efforts via SEO, SEM, SMO, and web Analytics.

Bumsoo Kim [2018] Facebook v/s Instagram: How perceived qualification and technological attributes are related to change in social media usage level of Facebook and Instagram. Passing time, browsing need for as well as technology attributes of Facebook and Instagram surveyed respondents who have both Facebook and Instagram accounts. Respondents who were more qualified with entertainment and need for recognition aspects and those who have positive attitudes towards Facebook recommendation algorithm features were more likely to report that they have increased use of the platform.

Saleem Alhabash Mengyan Ma [2017] A Tale of four platforms motivation and users of Facebook, Twitter, Instagram and Snapchat: The current research explores differences between Facebook, Instagram, Twitter and Snapchat in terms of intensity of use. With regard to use motivations Snapchat takes the lead in five of the nine motivations. Findings are discussed in relation to the U&G approach and uniqueness of different social media and social networking sites.

Area of Study

The area of Study is Bengaluru. Social media refers to a range of internet – based platforms, applications and technologies that allow people to socially engage with one another online. Some of the common examples of social media platforms are Instagram, Facebook, Twitter, Pinterest etc. Businesses use social media marketing as a tool to gain website traffic or attention by implementing marketing campaigns and because of its cost – effective features and ability to provide a greater customer. Most businesses are entering into social media marketing, making it a necessity for today’s business.

Findings

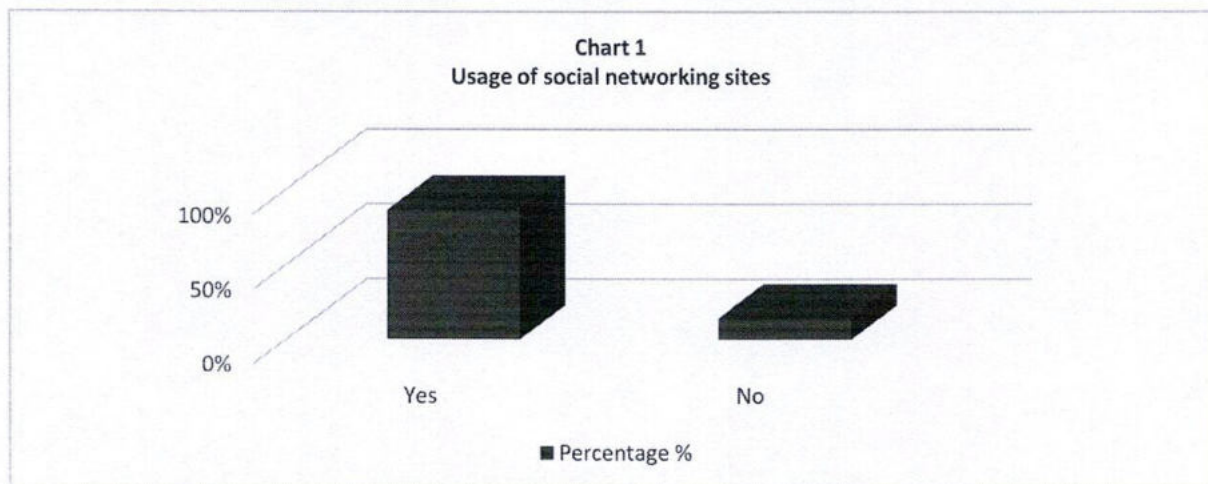

Purpose of using social media

Billions of people around the world use social media to share information and make connections. On a personal level, social media allows you to communicate with friends and family, learn new things, develop your interests, and be entertained. On a professional level, you can use social media to broaden your knowledge in a particular field and build your professional network by connecting with other professionals in your industry. At the company level, social media allows you to have a conversation with your audience, gain customer feedback, and elevate your brand.

Table 1: Usage of social networking sites

Conclusion

Instagram is limited to videos / photo, video, link etc., Facebook also has better posting systems more feature better user interface better cross platform support also the biggest win is that Facebook has more users and has been around longer than Instagram. It is becoming more popular, but Facebook definitely has more users. All those who are on Instagram are definitely on Facebook too. In this article we took 50 responses in that all most audience of social media chosen Instagram and they most use Instagram now a days and they said Instagram provide or helpful to business promotion. I can see Facebook and Instagram being a winning combination. Marketers can reach both audiences where they spend their time, with content that is relevant and effective. If your brand's audience is more focused (older or younger), then it may be best served with one platform or the other. Lastly, if you still feel unsure, try out both platforms and do some testing. After all, the last thing you want to do is leave anything to chance. To learn more about other Digital marketing strategies and best practices, do check out our Digital Marketing Certificate Course and Post Graduate Program in Digital Marketing. For years, we have focused on building the best experience for sharing photos with your friends and family. Now, we will be able to work even more closely with the Instagram team to also offer the best experience for sharing beautiful mobile photos with people based on your interests. We believe these are different experiences that complement each other. But in order to do this well, we need to be mindful about keeping and building on Instagram's strengths and features rather than just trying to integrate everything into Facebook. That's why we are committed to building

and growing Instagram independently. Millions of people around the world love the Instagram app and the brand associated with it, and our goal is to help spread this app and brand to even more people.
