<b>Target Audience</b>	:	SEM B.COM
<b>Resource Person(s) with qualification</b>	:	Asst. Prof. Deepashree. P

### The objective

One of the most famous astrophysicists alive gives us the greatest life advice that we will ever hear. I guarantee this video will leave you speechless and wanting more! This video helps the students to accept the advice to change their life in the future.

### Introduction:

This activity is conducted to accept the advice for the students to succeed in their lives. Nowadays, the youths are not at all listening to the good words from anybody else. I ensure that this video motivates the students to change their lives in the future.

We should always be striving for our passions. It should be the thing we wake up and do and what is on our minds when we go to sleep. The way forward is in helping others and making their lives better. Give value to people through what your goals.

To create something you're passionate about, you need the support and knowledge of others, not just yourself. You can only take things so far on your own. So, embrace the abilities of others and make journeys much greater than ever before. Learn from your surroundings and what people are saying about your product or service. Evolve with the times and make sure that you are not rigid in what you want to create.

Keep thinking about the ways you can build upon what others have done for the good of all. Get people excited about the world around them and inspire others to pursue their dreams. Never limit your scope by thinking small, and always keep moving forward past the failures you will inevitably have. Create things to show people you're thinking. People will be able to see your vision more clearly and it will help every process from that point forward.

Don't let anything hold you back from your dreams.

**The outcome of the programme.**

After listened to the video the students felt very happy about the topic that I was chosen and they are well satisfied. "Fear is not real. The only place that fear can exist is in our thoughts of the future. It is a product of our imagination, causing us to fear things that do not at present and may not ever exist. That is near insanity. Do not misunderstand me danger is very real but fear is a choice." - Will Smith.
