

Report on Career Talk on Manufacturing Jobs

Date: 20th Oct, 2018

Venue: Auditorium

Conducted By: Sashi Kumar-Alpha Tech

Organised by: Placement Cell

A Career Counselling session was conducted for final year students of PG, B.Com and BBA on "Manufacturing Jobs and Career" by Alpha Tech. There are a variety of manufacturing jobs available depending on the size of the company and the goods being produced. Because of this, the job duties, required education and average salaries of each manufacturing position differ. Understanding what a manufacturing job is can be useful in determining the right career path.

A manufacturing job involves the creation of new products either from raw materials or by assembling different components through physical, chemical or mechanical means. Manufacturing can exist on a large scale for items such as phones, cars, computers and food and beverages. It can also be a smaller operation for products like customer tailoring, wig making and other non-standard or custom items. Manufacturing creates products for nearly every industry, including: Healthcare, Construction, Textiles, Technology and Military.

The session began with a few communication games for students to promote interaction among everyone. Students actively participated in the games. The resources person gave guidelines on choosing jobs with respect to manufacturing sector. The session shared the details regarding few organizations where students can learn while on the job.

Students were given an opportunity to interact with corporate people and thus benefited in understanding the manufacturing process and the recruitment policies of manufacturing sector.

Toyota's Advanced Manufacturing Technician (AMT) program gave the students an ideology on how to land a decent job after graduation. The resource person made awareness about the ongoing training and recruitment process of manufacturing sectors.

Graduates of the program earn an associate degree and most do it without incurring any debt. Since the program combines classroom instruction with on-site work, students are paid on hourly basis and can get a raise every six months if they perform well. The session also gave insights on various job roles in manufacturing sector like:

- Instrumentation & Controls Technician
- Instrument Specialist/Technician
- Instrument & Automation Technician
- Instrumentation & Process Controls Technician (I & P)
- Automation Technician
- Process Control Technician
- Programmable Logic Controllers Technician
- Floor Assembler
- General Labourer
- Material Handler
- Packaging Engineer
- Painting and Coating Worker
- Photographic Processor
- Precision Assembler
- Processing Worker
- Production Painter
- Production Worker
- Semiconductor Processor
- Tool and Die Maker

Students greatly benefitted from the session and understood the aspects of manufacturing and the various positions available in the fast-growing industry.
