PROCEEDINGS OF BOS MEETING

Meetings of BoS (Both UG and PG) were convened at the Chairman's Chamber, Department of Electronic Science, Bangalore – 560009 to frame the syllabus for B Sc Electronic Course under the New Education Policy (NEP)-2020. The committee convened twice *i.e.*, on 17.09.2021 and 22.09.2021 and exhaustive deliberations were made. Finally, it was decided to adopt the syllabus framed by the expert committee for the first two semesters of the B Sc Electronics Course which has been submitted to the State Government, Government of Karnataka through Department of Higher Education Council (DHEC), Government of Karnataka with minor modifications.

The following members were present. (*The opinion and approval of the outstation members was received through e-mail due to Covid-19 restrictions*).

Sl No.	Name	Designation	Signature
1.	Dr J T Devaraju, Registrar (Evaluation), Bangalore University, Bengaluru. Professor, Department of Electronic Science, Bangalore University Bengaluru – 56056	Member(PG)	-Sd-
2.	Dr Manjesh Professor, Department of Electronic Science, Bangalore University, Bengaluru – 56056	Member (PG)	-Sd-
3.	Dr S Anuradha Assistant Professor, Department of Electronic Science, Bangalore University, Bengaluru – 56056	Member (PG)	-Sd-
4.	Dr B Satyanarayana Assistant Professor, Department of Electronic Science, Bangalore University, Bengaluru – 56056	Member (PG)	-Sd-
5.	Dr. Airani Mohammed Khan Professor, Department of Electronics, Mangalore University, Managalagangothri, Mangalore – 574199	Member (PG)	-Sd-
6.	Dr M Mahadev Prasad Professor, Department of Electronics, University of Mysore, P G Center, Hassan.	Member (PG)	-Sd-
7.	Dr Basavaraj N Jagadale Associate Professor, Department of Electronics, Kuvempu University, Jnana Sahyadri, Shankaraghatta	Member (PG)	-Sd-
8.	Dr Prakash Biswagar Professor, Department of E&C, RVCE, Mysore Road, Bangalore	Member (PG)	-Sd-
9.	Dr Subramanya Bhat Associate Professor, Department of Electronics, Vijaya College, Jayanagar, Bangalore	Member (UG)	-Sd-
10	Mrs Gayatri Sudhir Professor & Vice Principal, Department of Electronics, Oxford college of Arts, Science and Commerce, HSR Layout, Bangalore	Member (UG)	-Sd-
11	Mr Benny Sabastian Associate Professor, Department of Electronics, Christ University, Bangalore	Member (UG)	-Sd-
12	Dr H M Mahesh Professor and Chairman, Department of Electronic Science, Bangalore University, Jnana Bharathi, Bangalore – 560056	Chairman UG & PG	-Sd-

The Board placed a record of the appreciation for the members of the previous BOS members for their contributions to the academics of the department. The Chairman extended warm welcome to

the newly constituted members of the BOS and thanked for the acceptance of the invitation with short notice.

The main agenda of the meeting i.e., framing of syllabus for the B Sc degree in Electronics under NEP was taken for discussion. After thorough discussions the following resolutions were made.

The following Resolutions were made:

1. The committee unanimously agreed to adopt the structure (*appendix – 1*) suggested by the Karnataka State Higher Education Council (KSHEC) under NEP programme and also to consider the proposed curriculum for the First and Second semesters UG program in Electronics (*appendix -2*) with effect from 2021- 22
2. Minor changes in the curriculum were made related to the teaching hours for theory & practical classes, maximum marks for the papers and minimum marks for passing, credits to the respective papers, etc.
3. *Eligibility criteria for Admission to the B Sc Electronics:* Students who have qualified PUC/ 10+2/ITI or equivalent are eligible for opting Electronics in UG program.
4. Diploma in Electronics /Electrical / Medical Electronics/ Computer Science / Telecommunications or equivalent are eligible for lateral entry to III semester.
5. The board discussed about the option for the candidates to choose the open elective paper. After elaborate discussions it was unanimously decided that open elective may be given to all students including the candidates opted electronics as major subject.
6. The Scheme for awarding internal assessment for the students was discussed and approved.
7. It was resolved that number of students for practical shall be 10 (Ten) per batch per teacher.

Finally, the Chairman extended vote of thanks to all BOS members for their presence.

Preamble

This model curriculum content for B Sc (Honours) Electronics as per NEP – 2020, is intended to enable the graduates to respond to the current needs of the industry and equip them with skills relevant for national and global standards. The framework encourages innovation in teaching-learning process and appropriate assessment of student learning levels.

Introduction

BSc (Honours) Electronics is a program which needs to develop a specialized skill set among the graduates to cater to the need of industries.

The curriculum is designed to help the learners to analyse, appreciate, understand and critically engage with learning of the subject and also to provide better learning experience to the graduates. Apart from imparting disciplinary knowledge, the curriculum is aimed to equip the graduates with competencies like problem solving and analytical reasoning which provide them high professional competence.

The Department/Institute/University is expected to encourage its faculty concerned to make suitable pedagogical innovations, in addition to teaching/learning processes suggested in the model curriculum, so that the Course/Programme learning outcomes can be achieved.

Significance

In recent years, Electronics has made unprecedented growth in terms of new technologies, new ideas and principles. The research organizations and industries that work in this frontier area are in need of highly skilled and scientifically oriented manpower. This manpower can be available only with flexible, adaptive and progressive training programs and a cohesive interaction among the institutions, universities, and industries. The key areas of study within subject area of Electronics comprise of Semiconductor Devices, Analog and Digital Circuit design, Microprocessors & Microcontroller Systems, Computer Coding/ Programming in high level languages etc. and also modern applied fields such as Embedded Systems, Data Communication, Robotics, Control Systems, Nano Electronics and Nano Electronic Devices etc.

Eligibility criteria

Students who have qualified PUC/ 10+2 /ITI or equivalent are eligible for opting Electronics in UG program.

Diploma in Electronics / Electrical / Medical Electronics / Computer Science / Telecommunications or equivalent are eligible for lateral entry to III semester.

Program Objectives

The overall Objectives of the B.Sc. (Degree) / B.Sc. (Honours) Electronics program are to:

- Provide students with learning experiences that develop broad knowledge and understanding of key concepts of electronics and equip students with advanced scientific/technological capabilities for analyzing and tackling the issues and problems in the field of electronics.

- Develop ability in students to apply knowledge and skills they have acquired to solve specific theoretical and applied problems in electronics.
- Develop abilities in students to design and develop innovative solutions for benefits of society.
- Provide students with skills that enable them to get employment in industries or pursue higher studies or research assignments or turn as entrepreneurs.

Program Outcome

- Aptitude to apply Logic thinking and Basic Science knowledge for problem solving in various fields of electronics both in industries and research.
- To acquire experimental skills, analysing the results and interpret data.
- Ability to design / develop/manage/ operation and maintenance of sophisticated electronic gadgets / systems / processes that conforms to a given specification within ethical and economic constraints.
- Capacity to identify and implementation of the formulate to solve the electronic related issues and analyze the problems in various sub disciplines of electronics.
- Capability to use the Modern Tools/Techniques.

TENTATIVE COURSE STRUCTURE
(Major Discipline: ELECTRONICS) - Semesters 1 –8

SEMESTER	Discipline Core (DSC)	Major : Discipline Core (DSC)	OE / DSE
Semester 1	DSC 1	Electronic Devices and Circuits	OE 1.1: Domestic Equipment Maintenance OE 1.2: Renewable Energy and Energy Harvesting OE 1.3: Basics of Power Electronics & E Vehicles OE 1.4: PCB Design and Fabrication
Semester 2	DSC 2	Analog and Digital Electronics	OE 2.1: Consumer Electronics OE 2.2: Industrial Electronics OE 2.3: C Programming and interfacing with Arduino OE 2.4: Mobile communication OE 2.5: Mobile App Development
Semester 3	DSC 3	Digital Design Using Verilog and Programming in C	OE 3.1. Robotics OE 3.2. Introduction to Nano Science & Nano Electronics OE 3.3. Medical Electronics OE 3.4. Solar Energy, Devices and Applications
Semester 4	DSC 4	Electronic Communications – 1	OE 4.1. App Developments OE 4.2. Mems and Sensors OE 4.3. IOT and Applications OE 4.4. Virtual Reality & Real Time Applications
Semester 5	DSC 5 DSC 6	Microcontroller 8051 and PIC Communication – II	DSE 1: Computer Organization DSE 2: RFID Technology DSE 3: Photonics
Semester 6	DSC 7 DSC 8	Power Electronics, Sensors, PLCs, Transducers, and Instrumentation IOT and 5G communications	DSE 4: Cryptography DSE 5: Control Systems DSE 6: Project work (0+1+2)
Semester 7	DSC 9 DSC 10 DSC 11	Signals and Systems Embedded Systems Microwave Communications	DSE 7: Wireless communication DSE 8: Python Programming DSE 9: Mechatronics
Semester 8	DSC 12 DSC 13 DSC14	Digital Signal Processing VLSI Designing Image Processing	DSE 10: ARM Processor DSE 11: Computer Network DSE 12: AI, ML and Python Research Project

Proposed Curriculum Framework for Multidisciplinary Four - ear Undergraduate Programme/ Five-year Integrated Master's Degree Programme

YEAR	OBJECTIVES	NATURE OF COURSES	OUTCOME	NO. OF COURSES
1 st year – (1 st & 2 nd Semesters)	Understanding and Application of learnt knowledge	1. Major Core Courses 2. Minor/Related Discipline 3. Languages 4. Ability Enhancement Compulsory Courses 5. Skill Enhancement/Development Courses	Understanding of Disciplines Language Competency Gaining perspective of context/Generic skills Basic skills sets to pursue any	1+1 1+1 2+2 1+1 1+1
EXIT OPTION WITH CERTIFICATION				
2 nd Year (3 rd & 4 th Semesters)	Focus and Immersion	1. Major Core Courses 2. Minor/ Related Discipline 3. Ability Enhancement 4. Skill based Vocational 5. Extra-curricular Activities	Understanding of disciplines Gaining perspective of context Skill sets to pursue vocation Development of various Domains of mind &Personality	2+2 1+1 1+1 1+1 1+1
EXIT OPTION WITH DIPLOMA				
3 rd Year - (5 th & 6 th Semesters)	Real time Learning	1. Major Discipline Core and Elective Courses 2. Minor Discipline / Generic or Vocational Electives / Field based Learning/ Research Project	In depth learning of major and minor disciplines, Skill sets for employability. Exposure to discipline beyond the chosen Subject Experiential learning/Research.	2+2 1+1 1+1
EXIT OPTION WITH BACHELOR DEGREE				
4 th Year - (7 th & 8 th Semesters)	Deeper Concentration	Major Discipline Core and Elective Courses Research / Project Work with Dissertation	Deeper and Advanced Learning of Major Discipline Foundation to pursue Doctoral Studies & Developing Research competencies	4+4 4+4
EXIT OPTION WITH HONOURS DEGREE				
5 th Year - (9 th & 10 th Semesters)	Master of the subject	Major Discipline Core and Elective courses/ Research/ Project Work with Dissertation	Deeper and Advanced Learning of the Major Discipline towards gaining proficiency over the subject	4+4/6+6
MASTERS DEGREE				

COURSE PATTERN AND SCHEME OF EXAMINATION FOR B.SC. (ELECTRONICS) / B.SC. (HONS. IN ELECTRONICS)

Sl. No.	Semester	Title of the Paper	Teaching Hours	Hours /week		Examination Pattern Max. & Min. Marks /Paper						Duration of Exam (hours)		Total Marks / paper	Credits	
				Theory	Practical	Theory			Practical			Theory	Practical		Theory	Practical
						Max.	Min.	IA	Max.	Min.	IA

Course Outcomes (COs):

At the end of the course the student should be able to:

1. Aptitude to apply Logic thinking and Basic Science knowledge for problem solving in various fields of electronics both in industries and research.
2. To acquire experimental skills, analysing the results and interpret data.
3. Ability to design / develop / manage / operation and maintenance of sophisticated electronic gadgets / systems / processes that conforms to a given specification within ethical and economic constraints.
4. Capacity to identify and implementation of the formulate to solve the electronic related issues and analyze the problems in various sub disciplines of electronics.
5. Capability to understand the working principles of the electronic devices and their applications.

Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs)

ELE - CT1: ELECTRONIC DEVICES AND CIRCUITS

Content	Hrs
UNIT – 1	13
Chapter No. 1- Electronic Components: Electronic passive and active components, types and their properties, Concept of Voltage and Current Sources, electric energy and power (Qualitative only).	
Chapter No. 2- Network Theorems: Superposition, Thevenin's, Norton's, Maximum Power Transfer, and Reciprocity Theorems. DC and AC analysis of RC and RL circuits, RLC series and parallel Resonant Circuits.	
Chapter No. 3- PN junction diode: Ideal and practical diodes, Formation of Depletion Layer, Diode Equation and I-V characteristics. Idea of static and dynamic resistance, Zener diode, Reverse saturation current, Zener and avalanche breakdown.	
Chapter No. 4- Rectifiers: Half wave and Full wave (centre tap and bridge) rectifiers, expressions for output voltage, ripple factor and efficiency (mention only), Shunt capacitor filter. (Numerical examples wherever applicable).	
UNIT – 2	13
Chapter No. 5- Voltage regulator: Block diagram of regulated power supply, Line and Load regulation, Zener diode as voltage regulator – circuit diagram, load and line regulation, disadvantages. Fixed and Variable IC Voltage Regulators (78xx, 79xx, LM317), Clippers (shunt type) and clampers (Qualitative analysis only), Voltage Multipliers.	
Chapter No. 6- Bipolar Junction Transistor: Construction, types, CE,CB and CC configurations (mention only), VI characteristics of a transistor in CE mode, Regions of operation (active, cut off and saturation), leakage currents (mention only), Current gains α , β and γ and their inter-relations, dc load line and Q point. Applications of transistor as amplifier and switch - circuit and working. (Numerical examples wherever applicable).	
UNIT – 3	13
Chapter No. 7- Transistor biasing and Stabilization circuits: Fixed Bias and Voltage Divider Bias. Thermal runaway, stability and stability factor. Transistor as a two-port network, h-parameter equivalent circuit.	
Chapter No. 8- Amplifier: Small signal analysis of single stage CE amplifier using h-parameters. Input and Output impedances, Current and Voltage gains. Advantages of CC amplifier. Class A, B and C Amplifiers (qualitative), Types of coupling, two stage RC Coupled Amplifier – circuit, working and its Frequency Response, loading effect, GBW product, Darlington transistor, Current gain.	
Chapter No. 9- Special semiconductor diodes: Varactor diode, Schottky diode, Tunnel diode - construction, characteristics, working, symbol, and applications for each. LED, LCD and solar cell – construction, operation and applications, 7-segment display, concept of common anode and common cathode types (Numerical problems, wherever applicable)	
UNIT – 4	13
Chapter No. 10- Number System: Decimal, Binary, Octal and Hexadecimal number systems, base conversions. Representation of signed and unsigned numbers, Binary	

arithmetic; addition, subtraction by 1's and 2's complement method, BCD code (8421, 2421, Excess-3), Gray code, error checking and correction codes (Only parity check).	
--	--

Chapter No. 11- Boolean Algebra: Constants, variables, operators, basic logic gates-AND, OR, NOT, Positive and negative logic, Boolean laws, Duality Theorem, De Morgan's Theorem, simplification of Boolean expressions-SOP and POS. Derived logic gates (NAND, NOR, XOR & XNOR). Universal property of NOR and NAND gates. (Numerical examples wherever applicable).

ELE-OE 1.1: DOMESTIC EQUIPMENT MAINTENANCE

Content	Hrs
UNIT – 1	16
Chapter No. 1- Geyser: Construction and working, parts and manufacturing process, types. Common faults and their troubleshooting: Dripping geyser overflow, overheating, steam or hot water escaping from overflow, water leaking through the ceiling, no hot water, water not hot enough, poor hot water pressure. Induction cooker: Construction and working, parts and manufacturing process, types. Common faults and their troubleshooting: Cooker fuse blown, cooker buttons not working, cook top shuts off while cooking, food not get cooked or heated properly, overheating and uneven heating, display keep flashing, weird noises–crackling, fan noise, humming sound, clicking.	
UNIT – 2	16
Chapter No. 2- Microwave Oven: Working, raw material and manufacturing process, types, Common faults and their troubleshooting: Microwave does not heat, runs then stops, buttons do not work, plate do not spin, bulb does not turn ON during operation, sparking inside, shuts OFF after few seconds.	
Chapter No. 3- Refrigerator: Working, raw material and manufacturing process, electrical wiring diagram, types of refrigerator. Common faults and their troubleshooting: fridge not cooling, fridge not defrosting, leaking water, freezing food light not working, freezer is cooled but fridge stays warm, dead refrigerator, not enough cooling, keeps running, leakage, makes noise. Replacement procedure for: seal (gasket), evaporator fan motor, PTC relay, thermostat, compressor, bulb.	
Chapter No. 4- Demonstration Experiments: 1. Working of Geyser. 2. Working of Microwave Oven. 3. Working of Induction Cooker.	
UNIT – 3	16
Chapter No. 5- Air Conditioner: Working, raw material and manufacturing process, electrical wiring diagram, types. Common Faults and their troubleshooting: Faults in following parts of AC: Filter, thermostat, refrigerant leaks, breakers, capacitors, compressor, evaporator coils, condenser coils, warm contactor. General faults: AC UNIT has an odour, shuts ON and OFF repeatedly, does not blow cold air, repeatedly tripping a circuit breaker, indoor UNIT is leaking water inside the room, outdoor UNIT is making an unusually loud sound, room is not getting cold enough, AC not turning ON.	
Chapter 6. Demonstration Experiments: 1. Working of Air Conditioner. 2. Working of Refrigerator.

1. Aptitude to apply Logic thinking and Basic Science knowledge for problem solving in various fields of electronics both in industries and research.
2. To acquire experimental skills, analysing the results and interpret data.
3. Ability to design / develop / manage / operation and maintenance of sophisticated electronic gadgets / systems / processes that conforms to a given specification within ethical and economic constraints.
4. Capacity to identify and implementation of the formulate to solve the electronic related issues and analyze the problems in various sub disciplines of electronics.
5. Capability to use the Modern Tools / Techniques of the energy demands

Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs)

Course Outcomes (COs) / Program Outcomes (POs)	1	2	3	4	5	6
Aptitude to apply Logic thinking and Basic Science knowledge for problem solving in various fields of electronics both in industries and research	x					
To acquire experimental skills, analysing the results and interpret data.						
Ability to design / develop / manage / operation and maintenance of sophisticated electronic gadgets / systems / processes that conforms to a given specification within ethical and economic constraints.						
Capacity to identify and implementation of the formulate to solve the electronic related issues and analyze the problems in various sub disciplines of electronics.						
Capability to use the Modern Tools / Techniques of the energy demands	x					

Pedagogy: ICT lecture method, group discussion, seminar etc.

Formative Assessment	
Assessment Occasion	Weightage in Marks
Attendance / Specified Activity in the syllabus	05*
Internal Tests (Minimum of Two)	25
Assignments /Seminar / Case Study / Project work / Reports on - visits to industries/exhibitions/science centre's / active participation in Electronics competitions, etc.	10
Total	40

* **Criteria for awarding the marks: 75-85% - 2 marks; 85-95% - 4 marks and > 95% - 5 marks**

ELE-OE 1.2: RENEWABLE ENERGY AND ENERGY HARVESTING

Content	Hrs
UNIT – 1	24
Chapter No. 1- Fossil fuels and Alternate Sources of energy: Fossil fuels and nuclear energy, their limitation, need of renewable energy, non-conventional energy sources. An overview of developments in Offshore Wind Energy, Tidal Energy, Wave energy systems, Ocean Thermal Energy Conversion, solar energy, biomass, biochemical conversion, biogas generation, geothermal energy tidal energy, Hydroelectricity.	
Chapter No. 2- Solar energy: Solar energy, its importance, storage of solar energy, solar pond, non-convective solar pond, applications of solar pond and solar energy, solar water heater, flat plate collector, solar distillation, solar cooker, solar green houses, solar cell, absorption air conditioning. Need and characteristics of photovoltaic (PV) systems, PV models, equivalent circuits, and sun tracking systems.	
Chapter No. 3- Wind Energy harvesting: Fundamentals of Wind energy, Wind Turbines and different electrical machines in wind turbines, Power electronic interfaces, and grid interconnection topologies.	
Chapter No. 4- Demonstration Experiments: 1. Demonstration of training modules on solar energy, wind energy etc.	
UNIT – 2	24
Chapter No. 5- Ocean Energy: Ocean Energy Potential against Wind and Solar, Wave Characteristics, and Statistics, Wave Energy Devices. Tide characteristics and Statistics, Tide Energy Technologies, Ocean Thermal Energy, Osmotic Power, Ocean Bio-mass.	
Chapter No. 6- Geothermal Energy: Geothermal Resources, Geothermal Technologies.	
Chapter No. 7- Hydro Energy: Hydropower resources, hydropower technologies, environmental impact of hydro power sources. Piezoelectric Energy harvesting: Introduction, Physics and characteristics of piezoelectric effect, materials and mathematical description of piezoelectricity, Piezoelectric parameters and modeling piezoelectric generators, Piezoelectric energy harvesting applications, Human power. Electromagnetic Energy Harvesting: Linear generators, physics mathematical models, recent applications; Carbon captured technologies, cell, batteries, power consumption, Environmental issues and Renewable sources of energy, sustainability.	
Chapter No. 9- Demonstration Experiments: 1. Conversion of vibration to voltage using piezoelectric voltages. 2. Conversion of thermal energy into voltage using thermoelectric module.

Course Title: ELE-OE 1.3: BASICS OF POWER ELECTRONICS AND E-VEHICLES	Course Credits: 3
Total Contact Hours:48Hrs	Duration of ESA: 3 Hrs
Formative Assessment Marks: 40 marks	Summative Assessment Marks: 60 marks
Model Syllabus Authors:	

Course Outcomes (COs):

At the end of the course the student should be able to:

1. Acquire the knowledge of generation and electricity distribution systems
2. Understand working of Electric Vehicles and recent trends
3. Analyse different power converter topology used for electric vehicle application
4. Develop the electric propulsion UNIT and its control for application of electric vehicles

Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs)

Course Outcomes (COs) / Program Outcomes (POs)	1	2	3	4	5	6
Acquire the knowledge of generation and electricity distribution systems	x					
Understand working of Electric Vehicles and recent trends	x					
Analyse different power converter topology used for electric vehicle application	x					
Develop the electric propulsion UNIT and its control for application of electric vehicles	x					

Pedagogy: ICT lecture method, group discussion, seminar etc.

ELE-OE 1.3: BASICS OF POWER ELECTRONICS AND E-VEHICLES

Content	Hrs
UNIT – 1	24
Chapter No. 1- Generation of and Distribution of Electricity: Mention of hydro electric generator, diesel generator, thermal generator, wind power, solar, ocean waves. Generation of DC power – Mention of batteries. Single phase, Two phase and Three phase. Transformers. Power transmission and distribution. Domestic electrical wiring – connection from AC line to the meter, sockets, mention of phase neutral and the need of earthing. Mention of electric shock and safety. Mention of power type (ac or dc) and current ratings for home appliances. Mention of tester. Electric motor working principle. Inverter, Uninterrupted Power supply (UPS) – online and off line UPS, SMPS.	
Chapter No. 2- Demonstration Experiments: 1. Un boxing and assembling of desktop computers. 2. Types of motors and transformers used in household appliances. 3. Understanding voltage, current, frequency etc. of ac mains 4. Up gradation of RAM, hard disk and SSD 5. SMPS: Block diagram and working Inverter	
UNIT – 2	24
Chapter No. 3- E-Vehicles: Electric and Hybrid Electric Vehicles Configuration of Electric Vehicles, Performance of Electric Energy storage for EV and HEV Energy storage requirements, Battery parameters, Types of Batteries, Modelling of Battery, Fuel Cell basic principle and operation, Types of Fuel Cells, Super Capacitors. Power Electronic Converter for Battery Charging, charging methods for battery, Termination methods, charging from grid.	
Chapter No. 4-Demonstration Experiments: 1. Types of motors and transformers used in household appliances. 2. SMPS: Block diagram and working Inverter. 3. Simulation and analysis of electrical systems using MATLAB.

Course Content: First Semester B Sc Electronics

Course Title: ELE-OE 1.4 PCB DESIGN AND FABRICATION	Course Credits: 3
Total Contact Hours: 48 Hrs	Duration of ESA: 3 Hrs
Formative Assessment Marks: 40 marks	Summative Assessment Marks: 60 marks
Model Syllabus Authors:	

Course Outcomes (COs):

Upon the completion of this course, students will demonstrate the ability to:

1. Understand basics of PCB designing.
2. Apply advanced techniques, skills and modern tools for designing and fabrication of PCBs.
3. Apply the knowledge and techniques to fabricate Multilayer, SMT and HDI PCB.
4. Understand concepts of Packaging.

Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs)

Course Outcomes (COs) / Program Outcomes (POs)	1	2	3	4	5	6
Aptitude to apply Logic thinking and Basic Science knowledge for problem solving in various fields of electronics both in industries and research	x					
To acquire experimental skills, analysing the results and interpret data.						
Ability to design / develop / manage / operation and maintenance of sophisticated electronic gadgets / systems / processes that conforms to a given specification within ethical and economic constraints.						
Capacity to identify and implementation of the formulate to solve the electronic related issues and analyze the problems in various sub disciplines of electronics.	x

ELE-OE 1.4 - PCB DESIGN AND FABRICATION

CONTENT	Hrs
UNIT – 1	14
Chapter No. 1- Introduction to Printed circuit board: Fundamental of electronic components, basic electronic circuits, Basics of printed circuit board designing: Layout planning, general rules and parameters, ground conductor considerations, thermal issues, check and inspection of artwork.	
Chapter No. 2- Design rules for PCB: Design rules for Digital circuit PCBs, Analog circuit PCBs, high frequency and fast pulse applications, Power electronic applications, Microwave applications.	
UNIT – 2	18
Chapter No. 3- Introduction to Electronic design automation(EDA) tools for PCB designing: Brief Introduction of various simulators, SPICE and PSpice Environment, Selecting the Components Footprints as per design, Making New Footprints, Assigning Footprint to components, Net listing, PCB Layout Designing, Auto routing and manual routing. Assigning specific text (silkscreen) to design, creating report of design, creating manufacturing data (GERBER) for design.	
Chapter No. 4 –Introduction printed circuit board production techniques: Photo printing, film-master production, reprographic camera, basic process for double sided PCBs photo resists, Screen printing process, plating, relative performance and quality control, etching machines, Solder alloys, fluxes, soldering techniques, Mechanical operations. Demonstration	
UNIT – 3	16
Chapter No. 5- PCB design for EMI/EMC: Subsystem/PCB Placement in an enclosure, Filtering circuit placement, decoupling and bypassing, Electronic discharge protection, Electronic waste; Printed circuit boards Recycling techniques, Introduction to Integrated Circuit Packaging and footprints, NEMA and IPC standards	
Chapter No. 6-PCB Technology Trends: Multilayer PCBs. Multi wire PCB, Flexible PCBs, Surface mount PCBs, Reflow soldering, Introduction to High-Density Interconnection (HDI) Technology.	
Demonstration : Demonstration on the PCB designing and etching experiments

SECOND SEMESETER

Course Content: Second Semester B Sc Electronics

Course Title: ELE - CT2: ANALOG AND DIGITAL ELECTRONICS	Course Credits: 4
Total Contact Hours: 52 Hrs	Duration of ESA: 4Hrs
Formative Assessment Marks: 40 marks	Summative Assessment Marks: 60 marks

Course Outcomes (COs):

At the end of the course the student should be able to:

1. Understand and study the behaviour of the semiconductor devices ie., I-V characteristics of various MOSFET devices the knowledge can be extended for understanding the behaviour /characteristics/ response of unknown / novel devices.
2. Applying the standard device models to explain/calculate critical internal parameters of semiconductor devices.
3. Understanding and characterizing the behaviour of known/unknown/novel power electronic devices such as UJT, SCR, Diac, Triac etc.
4. Acquainting and familiarization of the experimental skills to determine the behaviour of semiconductor devices.
5. Capable of analyzing the device characteristics and responses.
6. Understanding the working of basic logic gates, concepts of Boolean algebra and techniques to reduce/simplify Boolean expressions and their applications.
7. Synthesizing and Analyzing combinatorial and sequential circuits and their applications in electronics

Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs)

Course Outcomes (COs) / Program Outcomes (POs)	1	2	3	4	5	6

ELE - CT2: ANALOG AND DIGITAL ELECTRONICS

Content	Hrs
UNIT – 1	13
Chapter No. 1- JFET –Types - p-channel and n-channel, working and I-V characteristics - n-channel JFET, parameters and their relationships, Comparison of BJT and JFET.	
Chapter No. 2- MOSFET: E–MOSFET, D–MOSFET – n-channel and p-channel, Construction, working, symbols, biasing, drain and transfer characteristics, VMOS, UMOS Power MOSFETs, handling, MOS logic, symbols and switching action of MOS, NMOS inverter, CMOS logic, CMOS – inverter, circuit and working, CMOS characteristics, IGBT construction and working.	
Chapter No. 3-UJT: Construction, working, equivalent circuit and I-V characteristics, intrinsic stand-off ratio, Relaxation oscillator.	
Chapter No. 4- SCR: Construction, VI characteristics, working, symbol, and applications – HWR and FWR.	
Chapter No. 5- Diac and Triac: Construction, working, characteristics, applications, (Numerical examples wherever applicable)	
UNIT – 2	13
Chapter No. 6- Op-Amp: Differential Amplifier, Block diagram of Op-Amp, Characteristics of an Ideal and Practical Op-Amp, Open and closed loop configuration, Frequency Response, CMRR, Slew Rate and concept of Virtual Ground.	
Chapter No. 7- Applications of op-amps: Concept of feedback, negative and positive feedback, advantages of negative feedback (Qualitative Study). Inverting and non-inverting amplifiers, Summing and Difference Amplifier, Differentiator, Integrator, Comparator and Zero-crossing detector.	
Chapter No. 8-Filters: First and Second order active Low pass, High pass and Band pass Butterworth filters.	
Chapter No. 9-Oscillators: Barkhausen criterion for sustained oscillations, Colpitt’s oscillator and crystal oscillators using transistor, Phase Shift oscillator, Wien-bridge oscillator – (no derivation for each)	
Chapter No. 10-IC 555Timer: Introduction, Block diagram, Astable and Monostablemultivibrator circuits. (Numerical Examples wherever applicable)	
UNIT – 3	13
Chapter No. 11- Logic Families: Pulse characteristics, Logic Families-classification of digital ICs. Characteristics of logic families, circuit description of TTL NAND gate with totem pole and open collector. TTL IC terminology. CMOS NAND, Comparison of TTL and CMOS families.	
Chapter No. 12- Combinational Logic Circuits: Minimisation techniques using K-maps - SOP and POS, Minterm, Maxterm, SSOP, SPOS, Simplification of Boolean expressions, K-Map for 3 and 4 variables.	
Chapter No. 13- Digital to Analog Converter: DAC with binary weighted resistor and R-2R resistor ladder network. Analog to Digital converter: Successive approximation method-performance characteristics.	

Chapter No. 14- Design of Arithmetic Logic Circuits: Half Adder, Full Adder, Half Subtractor, Full Subtractor. 4-bit parallel binary adder, 2-bit and 4-bit magnitude comparator. Encoder, decimal to BCD priority encoder. Decoder, 2:4 decoder using AND gates, 3:8 decoder using NAND gates, BCD to decimal decoder, BCD to 7-Segment decoder, Multiplexer - 4:1 and 8:1 multiplexer, Demultiplexer - 1:4 and 1:8 demultiplexer (logic diagram and truth table of each), Realization of Full adder and Full Subtractor using Mux and Decoder.	
UNIT – 4	13
Chapter No. 15- Sequential Logic Circuits: Flip-Flops - SR Latch, RS, D and JK Flip-Flops. Clocked (Level and Edge Triggered) Flip-Flops. Preset and Clear operations. Race-around conditions in JK Flip-Flop. Master- Slave JK and T Flip-Flops. Applications of Flip-Flops in semiconductor memories, RAM, ROM and types.	
Chapter No. 16- Registers and Counters: Types of Shift Registers, Serial-in-Serial-out, Serial-in-Parallel-out, Parallel-in-Serial-out and Parallel-in-Parallel-out Shift Registers (only up to 4 bits), applications. Ring counter, Johnson counter applications. Asynchronous Counters: Logic diagram, Truth table and timing diagrams of 4bit ripple counter, modulo-n counters, 4bit Up-Down counter, Synchronous Counter: 4-bit counter, Design of Mod 3, Mod 5 and decade Counters using K-maps.

ELE-CP2: ANALOG AND DIGITAL ELECTRONICS - PRACTICAL
(Hardware and Circuit Simulation Software)

Content	Hrs
Minimum Six Experiments to be performed in each Part	
PART - A (Any SIX)	16
<ol style="list-style-type: none"> 1. Study of JFET/MOSFET characteristics – determination of parameters. 2. Study of single stage JFET amplifier. (frequency response and band width) 3. UJT characteristics and relaxation oscillator 4. SCR characteristics – determination of I_H and firing voltage for different gate currents. 5. Design of inverting and non-inverting amplifier using Op-amp & study of frequency response. 6. Op-amp inverting and non-inverting adder, subtractor and averaging amplifier. 7. Study of the zero-crossing detector and comparator. 8. Design and study of differentiator and integrator using op-amp for different input waveforms. 9. Design and study of Wien bridge and RC phase shift oscillator using op-amp. 10. Design and study of first order high-pass and low-pass filters using op-amp. 11. Study of Colpitt's and crystal oscillator using transistor. 12. Astable multivibrator using IC - 555 timer. 13. Monostable multivibrator using IC-555 timer. 	
PART – B (Any SIX)	16
<ol style="list-style-type: none"> 1. Half Adder and Full Adder using (a) logic gates (b) using only NAND gates. 2. Half Subtractor and Full Subtractor (a) logic gates (b) using only NAND gates. 3. 4 bit parallel binary adder and Subtractor using IC7485. 4. Study of BCD to decimal decoder using IC7447 5. Study of the Encoders and priority encoders. 6. Study of Multiplexer and Demultiplexer using ICs. 7. Study of 2-bit and 4-bit magnitude comparators. 8. Study of Clocked RS, D and JK Flip-Flops using NAND gates. 9. Study of 4-bit asynchronous counter using JK Flip-Flop IC7476, modify to decade counter and study their timing diagrams. 10. Study of 4-bit Shift Register – SISO, modification to ring counter using IC 7495. 11. Digital to Analog converter using binary weighted resistor method, determination of resolution, accuracy and linearity error.

Content	Hrs
UNIT – 1	16
Chapter No. 1- Timer and PLL: Functional block diagram of 555 Timer, Monostable operation and its Application, Astable operation and its Applications.	
Chapter No. 2- Phase Locked Loop: Functional block diagram – Phase detector / Comparator, Voltage Controlled Oscillator, Low pass filter, Applications: Frequency multiplier/ Division, AM detection.	
UNIT – 2	16
Chapter No. 3- Operational Amplifier: Inverting and non-inverting amplifier, Op-amp parameters, Summing Amplifier, Difference Amplifier, Integrator, Differentiator, Instrumentation Amplifier, Audio Amplifier(LM386), Voltage to current converter, Current to Voltage converter, Sample and Hold circuits.	
Chapter No. 4- First order active filters: Construction, working and applications of Low pass, High pass, Band pass, Band reject and all pass filters. Phase-shift and Wein bridge oscillator using op-amp (Circuit diagram and formula only).	
UNIT – 3	16
Chapter No. 5- Transducers: Transducers, types, working of transducers., Displacement transducers - Resistive (Potentiometric, Strain Gauges – Types, Gauge Factor, bridge circuits, Semi-conductor strain gauge), Capacitive (diaphragm), Hall effect sensors, Magnetostrictive transducers, Microphone, Touch Switch, Piezoelectric sensors, light (photo-conductive, photo emissive, photo voltaic, semiconductor, LDR), Temperature (electrical and non-electrical), Pressure sensor.	
Chapter No. 6- A-D and D-A Conversion: D-A conversion: 4bit binary weighted resistor type, circuit and working. Circuit of R-2R ladder- Basic concept. A-D conversion characteristics, successive approximation ADC. (Mention the relevant ICs for all).

Course Content: Second Semester B Sc Electronics

Course Title: ELE-OE 2.3: CPROGRAMMING AND INTERFACING WITH ARDUINO	Course Credits: 3
Total Contact Hours: 48Hrs	Duration of ESA: 3 Hrs
Formative Assessment Marks: 40 marks	Summative Assessment Marks: 60 marks
Model Syllabus Authors:	

Course Outcomes (COs):

At the end of the course the student should be able to:

1. Aptitude to apply Logic thinking and Basic Science knowledge for problem solving in various fields of electronics both in industries and research.
2. To acquire experimental skills, analysing the results and interpret data.
3. Ability to design / develop / manage / operation and maintenance of sophisticated electronic gadgets / systems / processes that conforms to a given specification within ethical and economic constraints.
4. Capacity to identify and implementation of the formulate to solve the electronic related issues and analyze the problems in various sub disciplines of electronics.
5. Capability to understand the programming techniques and computer skills

Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs)

Course Outcomes (COs) / Program Outcomes (POs)	1	2	3	4	5	6
Aptitude to apply Logic thinking and Basic Science knowledge for problem solving in various fields of electronics both in industries and research						
To acquire experimental skills, analysing the results and interpret data.						
Ability to design / develop / manage / operation and maintenance of sophisticated electronic gadgets / systems / processes that conforms to a given specification within ethical and economic constraints.						
Capacity to identify and implementation of the formulate to solve the electronic related issues and analyze the problems in various sub disciplines of electronics.	x					
Capability to understand the programming techniques and computer skills	x					

Pedagogy: ICT lecture method, group discussion, seminar etc.

Formative Assessment	
Assessment Occasion	Weightage in Marks
Attendance / Specified Activity in the syllabus	05*
Internal Tests (Minimum of Two)	25
Assignments /Seminar / Case Study / Project work / Reports on - visits to industries/exhibitions/science centre's / active participation in Electronics competitions, etc.	10
Total	40

* *Criteria for awarding the marks: 75-85% - 2 marks; 85-95% - 4 marks and > 95% - 5 marks*

ELE-OE 2.3: C PROGRAMMING AND INTERFACING WITH ARDUINO

Content	Hrs
UNIT – 1	14
Chapter No. 1- Basics of C programming: Introduction, Importance of C, Character set, Tokens, keywords, identifier, constants, basic data types, variables: declaration & assigning values. Structure of C program Arithmetic operators, relational operators, logical operators, assignment operators, increment and decrement operators, conditional operators, bit wise operators, expressions and evaluation of expressions, type cast operator, implicit conversions, precedence of operators. Arrays-concepts, declaration, accessing elements, storing elements, two-dimensional and multi-dimensional arrays. Input output statement–printf(), scanf() & getch()) and library functions (math and string related functions).	
UNIT – 2	12
Chapter No. 2- Decision making, branching & looping Decision making, branching and looping: if, if-else, else-if, switch statement, break, for loop, while loop and do loop. Functions: Defining functions, function arguments and passing, returning values from functions, example programs. Chapter No. 3: Structures and unions defining and declaring structure variables, accessing structure members, initializing a structure, copying and comparing structure variables, array of structures, arrays within structures, structures within structures, structures and functions. Unions-size of structures, bit fields, example programs.	
UNIT – 3	22
Chapter No 4. Introduction to Microcontrollers: Common features of Microcontroller, Different types of microcontroller, Introduction to Arduino, Pin configuration and architecture, Device and platform features, Concept of digital and Analog ports, Familiarizing with Arduino Interfacing Board, Introduction to Embedded C and Arduino platform, Arduino i/o Functions, Pins Configured as INPUT, Pull-up Resistors, Pins Configured as OUTPUT, pin Mode() Function, digital Write() Function, Analog Read() function , Arduino Interrupts, Arduino Time -Incorporating Arduino time, delay() function, delay Micro-seconds() function, Millis() function, Micros()	
Chapter No. 5- Arduino Displays: Working with Serial Monitor, Line graph via serial monitor, Interfacing a 8 bit LCD to Arduino, Fixed one line static message display, Running message display, Using the LCD Library of Arduino.	
Chapter No. 6 - Arduino Sensors: Arduino – Humidity Sensor, Arduino – Temperature Sensor, Arduino – Water Detector / Sensor, Arduino – PIR Sensor, Arduino – Ultrasonic Sensor, Arduino – Connecting Switch (Magnetic relay switches)

ELE-OE 2.4: MOBILE COMMUNICATION

Content	Hrs
UNIT – 1	16
Chapter No. 1- Evolution of mobile radio Communication-Examples of wireless communication system: paging systems, cordless telephone system, cellular telephone system- Trends in cellular radio and personal communication systems	
UNIT – 2	16
Chapter No. 2- Frequencies for radio transmission- Basics of multiplexing and multiple access techniques-CDMA-Cellular system concepts- Frequency reuse- Channel assignment and handoff strategies- Improving capacity in cellular system: cell splitting, sectoring, repeaters for range extension, a microcell zone concept.	
Chapter No 3: Wireless LAN, Infrared vs radio transmission, Bluetooth: user scenarios and architecture.Basic concepts of 2G,3G, 4G/ LTE, 5G.	
UNIT – 3	16
Chapter No.4-Introduction to telecommunicating system- GSM: mobile services (Bearer services, tele-services, supplementary services), system architecture (radio subsystem, network and switching subsystem, operation sub system) Satellite system: history, application, basics, routing, localization and handover- Broadcast system: digital audio broadcasting, digital video broadcasting (basic concepts).

ELE-OE 2.5: MOBILE APP DEVELOPMENT

Content	Hrs
UNIT – 1	16
Chapter No. 1- Introduction: What is mobile Application Programming, Different Platforms, Architecture and working of Android, iOS and Windows phone 8operating system, Comparison of Android, iOS and Windows phone 8	
Chapter No. 2- Android Development Environment: What is Android, Advantages and Future of Android, Tools and about Android SDK, Installing Java, Eclipse, and Android, Android Software Development Kit for Eclipse, Android Development Tool: Android Tools for Eclipse, AVDs: Smartphone Emulators, Image Editing	
Chapter No. 3- Android Software Development Platform: Understanding Java SE and the Dalvik Virtual Machine, Directory Structure of an Android Project, Common Default Resources Folders, The Values Folder, Leveraging Android XML, Screen Sizes, Launching Your Application: TheAndroidManifest.xml File, Creating Your First Android Application.	
UNIT – 2	16
Chapter No. 4- Android Framework Overview: The Foundation of OOP, The APK File, Android Application Components, Android Activities: Defining the User Interface, Android Services: Processing in the Background, Broadcast Receivers: Announcements and Notifications, Content Providers: Data Management, Android Intent Objects: Messaging for Components, Android Manifest XML: Declaring Your Components.	
Chapter No. 5- Views and Layouts, Buttons, Menus, and Dialogs, Graphics Resources in Android: Introducing the Drawable, Implementing Images, Core Drawable Subclasses, Using Bitmap, PNG, JPEG and GIF Images in Android, Creating Animation in Android.	
Chapter No. 6-Handling User Interface(UI) Events: An Overview of UI Events in Android, listening for and Handling Events, Handling UI Events via the View Class, Event call back methods, Handling Click Events, Touch screen Events, Keyboard Events, Context Menus, Controlling the Focus.	
UNIT – 3	16
Chapter No. 7-Content Providers: An Overview of Android Content Providers, defining a Content Provider, Working with a Database.	
Chapter No. 8- Intents and Intent Filters: Intent, Implicit Intents and Explicit Intents, Intents with Activities, Intents with Broadcast Receivers.	
Chapter No. 9- Advanced Android: New Features in Android 4.4.	
Chapter No. 10-iOS Development Environment: Overview of iOS, iOS Layers, Introduction to iOS application development.	
Chapter No. 11-Windows Phone Environment: Overview of windows phone and its platform, Building windows phone application	

Compulsory activity: *Development of mobile App*
