Accredited with NAAC "A" Grade || Recognised under 2(f) & 12(b) of the UGC Act
A FRANSALIAN INSTITUTE OF HIGHER LEARNING

Date: 20th July, 2019
Venue: Kammasandra
Conducted By: CSA, St. Francis De Sales College
Attended By: 45
Organized By: St. Francis De Sales College.

20th July, the Center for Social Action conducted an initiative of No Plastic Campaign in Bommasandra, Bangalore. This campaign is conducted under the motivation of Prof. Geetha. The aim of this campaign is regarding environment conversion of reusing plastics. While campaigning the following key points were written on the color chart paper:

- Re use plastic bags.
- Help Earth rejuvenate; say NO to plastic
- If you can't reuse it, refuse it.
- Keep Calm and Go Green.
- Join hands to save our environment.
- Conservation is a state of harmony between

The knowledge that is absolutely valuable and significant to be aware and conscious about the world around us. It is true that a good initiative will only attract positive energy.

Plastic recycling is an essential procedure in the production of plastic. Plastic recycling is the method of gathering waste plastic and reconvert them to new and useful plastic products. The world produces and makes use of more than a trillion pounds of plastic material. Plastic recycling ensures that this massive amount of plastic does not go to waste. Instead, you can reprocess the materials to get other products.

While plastic has many valuable uses, we have become addicted to single-use or disposable plastic, with severe environmental consequences. Around the world, one million plastic drinking bottles are purchased every minute, while 5 trillion single-use plastic bags are used worldwide every year. In total, half of all plastic produced is designed to be used only once, and then thrown away.

It is a perfect product that is fun, useful as well as sustainable to help children recognize and realize the ill effects of wastage and pollution caused due to plastic. It's an enjoyable medium for them to learn significant life-long lessons that will empower future generations as well as the ecosystem. Our recycled plastics can even be an impressive corporate gift.

Today we will be telling about something unique and innovative. We all talk about saving the environment and preventing plastics from causing pollution and creating environmental awareness. But when it comes to applying the same thing in practical life most of us fail miserably. We all are aware of the fact that the plastics are used everywhere though people say it's banned. Recently, some of the things are made up of recycled plastics as well. This new academic season let us all pledge to ditch the use of plastics and get our society to use the best of all recyclable things. The use of recyclable materials must be used by the society and let's all pledge to conserve our environment.

Thus, recycling of plastics today proves to be a sustainable and wise decision for the future and a win-win situation for both humans as well as the ecosystem.
