Python is an interpreted high-level general-purpose programming language. Python's design philosophy emphasizes code readability with its notable use of significant indentation. Its language constructs as well as its object-oriented approach aim to help programmers write clear, logical code for small and large-scale projects. The Department of Science conducted an online two day workshop on python under the support of Research & IP Cell on 5th 6th May 2021 at 3:00PM. The main objective of the workshops was to familiarise the beginners in Python on its installation, command and programs.

The resource person, Dr. Shivasharanappa Sigarkanti who is an Associate Professor at Department of Mathematics, Government First Grade College, K.R. Puram, is an expert in handling the programming language. The resource person has proven record of his expertise in explaining the mathematical concepts like the weddles rule, Simpsons rule. The resource person could handle the session as per the objectives of the workshop. The mathematical approach was very clear in his talk.

There were about 100 participants registered for the workshop which a majority of under graduate students.

The most valuable outcome of this workshop was that the organisers could bring the participants, mainly students and faculty members inside and outside Karnataka under a platform lead by an expert like Dr. Sigarkanti and could learn or get introduced to the installation, commands and programs of Python. As the feedback says, the two days were fruitful for the participants.
