THE ROLE OF WOMEN: IN INDIAN AGRICULTURE SECTOR

Prof. Ajitha Shaji,
Assistant Professor,
Department of Humanities,
St Francis De Sales
College,Bangalore,
Karnataka.

Abstract

country. The main occupation is agriculture, because 70 per is involved in this occupation. This paper examines the ways integration through agriculture impact women. This paper finds that many jobs for women in agriculture sector. Jobs that bring many under women control leads to greater earnings in the family. are more than ever finally employed, differences in wages earned and men persist in India. Due to these reasons and women's lower compel the women have a greater tendency to remain in subsistence The impact of liberalization and globalization on women is important because they represent almost half of the total population, but also because constraints, which make them less beneficial from the liberalization. Once impacts areascertained well designed policy responses may aid women in advantage of greater openness to agriculture."

Developing, country, occupation, agriculture, women, globalization.

Introduction:

Swaminathan, the famous agricultural scientist describes that it was woman who domesticated crop plants and thereby initiated the art and science of farming. While men wentout hunting in search of food, women started gathering seeds from surrounding flora and began cultivating those of interest from the point of view of food, fodder, fiber and fuel. Womenhave played and continue to play a key role in
