**Ethics is what guides us to tell the truth, keep our promises, or help someone in need.**

There is a framework of ethics underlying our lives on a daily basis, helping us make decisions that create positive impacts and steering us away from unjust outcomes.

A session on Ethics in life was conducted on 27th May 2022 by the Department of Science for IV Semester BSc students. Dr. Nebula Murukesh, Head, Department of science, St Francis de Sales College, Bangalore-100 delivered the session.

The objective of the session was to make the students aware of the role ethics in practising science. The scientific activity has been competitive all along. However, during the last few decades, there has been an explosion of knowledge and the advent of the digital age. The noble profession of scientific research and academics has been marred by the temptation to falsify and fabricate data, plagiarism and other unethical practices. Broadly speaking, the breach of ethics involves: plagiarism, falsification of data, redundant (duplicate) publication, drawing far-fetched conclusions without hard data, for early

publicity, gift authorship (receiving as well as giving), not giving sufficient attention and consideration to scholars.

The session was carried out with activities invoicing self thoughts. The concept of plagiarism and social responsibility was introduced to the students through the session.
