OBJECTIVE:

It inspires readers to be reflective and introspective as part of developing as authors. This approach not only adds meaning to the purpose of writing but provides directions to authors to develop their identities by adopting conscious practices towards writing about teaching and learning in multiple genres.

INTRODUCTION:

The librarian asked the interested faculty members to pick the books and do the review on it.

To continue the process of introspection and preparation to engage in the dialogue, part three of the book explains the underlying motivational process for writing about teaching and learning, which essentially emanates from the identity of being a writers and it prepares readers to think about the precursors of writing by seeking answers to questions such as: What is the motivation behind your writing? What are your preferred outlets for publication? Would you work alone or in collaboration? (p.51). Readings from this section lay a solid foundation for the authors and pave a way to move forward. The final section of this part is unique and rare in similar types of publication. It discusses important criteria for choosing an appropriate outlet in alignment with technical, motivational, and personal preferences of authors by providing authentic information about a variety of journals of teaching and learning.

OUTCOME:

This mainly focuses on making writing public and participating in scholarly conversations on learning and teaching. Besides regular advise on choosing an outlet and submitting a manuscript, the section discusses strategies for revising the manuscript and, more importantly, promoting the published work in effective ways.

Books review writing are an effective learning tool that teachers use to help students retain and analyze the information from their assigned readings. Book review also encourage students to formulate different perspectives and to practice critical thinking. Many teachers use book review to encourage the development of analytical, communication and reflective skills, which benefit students in their professional and academic pursuits.
