Title	Industry Collaborative Activity - Preparing for industry needs
Date of Event	17/08/2022
Department	Department of Science
Venue	Room No - 410
Number of Participants	50
Target Audience	Students from Department of Science
Event Coordinator	Prof. Rashmi Coordinator , Department of science

The Department of Science, St Francis de Sales College organized Industry Collaborative Activity on Preparing for Industry needs on 17/08/2022

### Objective

To prepare the students to fill the gap between their theoretical knowledge and the industry needs.

### Resource Person

Mr. Srinivasa Rao B, Technical Director, Chip In-Tech-Embedded Solutions Pvt.Ltd.

The session started at 11am. The resource person shared his experience in the industry field as an employee and then as an employer.

An embedded system is a microprocessor-based computer hardware system with software that is designed to perform a dedicated function, either as an independent system or as a part of a large system. At the core is an integrated

circuit designed to carry out computation for real-time operations.

An embedded system usually requires a wide range of operating systems, programming tools, and microprocessors. Each system has to be customised and adjusted to the needs of the hardware that it has to control and run on. He has addressed the students on the required technical skills to become an embedded engineer. The students should have the knowledge on Microcontrollers, or MCUs, C and C++, Real-time Operating Systems (RTOS), Device drivers, including Linux operating system, Communication Protocols, Interface buses like I2C and SPI, General-purpose input/output, or GPIOs. During their under graduation students learned some of these skills. Mr. Rao guided the students to learn some of these skills by themselves so that when they approach the industry it will be easy and fast for the students to get involved in the industry projects.

#### Outcome

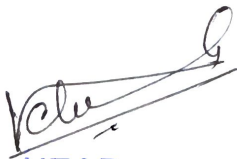

Students were able to identify the gap between the curriculum of microcontroller and the industry of embedded system. It helps the students to learn required technical skills.

### Report on Career Counselling

Title	Career counselling
Date of Event(s)	October 11 <sup>th</sup> 2021
Department / Association	Department Of Science
Venue	Online(Google Meet)
Number of Participants	24
Target Audience	Final year PCM students

Resource Person(s) with qualification	Dr. Nirmala Vaz, Coodinator, Department of Chemistry and Boichemistry
Books (if published)	

Place of visit/ details of Industrial visit place (if applicable):	
--	--

Career counselling is the process of understanding and assessing another individual's concern, strengths, interests, and capabilities, in order to guide them towards the right career path. The process guides a candidate in understanding and pursuing the right career options as per their interests. All of us **require career guidance** at some point in our life. It helps us get insights about ourselves, our career and what we can do to improve it.

Here are a few reasons that state that '**we need career counselling**':

- **Shows the right career path** – Career counselling helps in choosing the right career path that is the most suitable according to an individual's characteristics.
- **Insight about ourselves** – We discover ourselves after going through the process of counselling. We find our strengths and weaknesses and how we can work on them.
- **Boosts confidence** – Proper evaluation and guidance can make a candidate sure about his/her choices. It reduces the stress regarding future and other pressure points.
- **Access to expert knowledge** – A good career counsellor gives you access to all the information you need to make the right decisions and gives you the result based on the results and expert knowledge.

Career counselling session was organized on 11<sup>th</sup> October 2021 by the Department for B.Sc III year students to make them aware about various opportunities and trends in the field of science after graduation. The Resource persons for the session was Dr. Nirmala Vaaz. Dr. Nebula Murukesh, Head, department Of Science, welcomed and gave a brief introduction of the Resource person. She suggested varied ways that how to opt the career in one's life depending on the capabilities and potential. She talked about how to focus on

the chosen career and what are the efforts to be put in to make that dream true. Dr. Nirmla Vaz, Coordinator, department of Chemistry and Biochemistry also apprised the students with various career options in chemistry and the field of science. She motivated the students to be confident and communicative in life. Besides, hard work, time management and focus on the line opted are important aspects to be taken care of. The students cleared their doubts by asking various questions regarding the confusions, they usually face while deciding their career. All the students were highly motivated and got to know about various opportunities after completing their graduation. It was a very informative day for the students.

## A FRANSALIAN INSTITUTE OF HIGHER LEARNING

Report - Career orientation and skill development program

Title	Career orientation and skill development program
Date of Event(s)	27-05-2022
Department / Association	Department of Science in Collaboration with Eureka.
Venue	Offline
Number of Participants	60
Target Audience	Science undergraduates
Resource Person(s) with qualification	Dr. Sreejith Pandinhatteeri, Assistant Professor in Physics, Manipal Center for Natural Sciences
Books (if published)	
Place of visit/ details of Industrial visit place (if applicable):	

Aditya-L1 is a **spacecraft mission to study the Sun**. It has been designed and will be built in collaboration between the Indian Space Research Organisation (ISRO) and various Indian research institutes. It is ISRO's second space-based astronomy mission after AstroSat for a scientific expedition to study the Sun. The mission was initially named Aditya 1 which was limited to observing only the solar corona. The objective of Aditya L1 mission is to study Sun's Corona, Chromosphere and Photosphere. The reason behind Corona getting heated to very high temperatures is still a mystery in Solar Physics. Aditya -1 mission involved placing the satellite in 800 Km low earth orbit. Later ISRO planned to place the satellite in the halo orbit around the Lagrangian Point (L1). L1 is 1.5 million Km from the Earth. This point provides the advantage of observing the Sun continuously without any disturbance. Hence the mission was renamed as Aditya L1 mission. It is one of the important cornerstones in the history of ISRO.

In this context a webinar was conducted by Department of Science in Collaboration with Eureka club, an association of Physics. Dr. Sreejith Pandinhatteeri was the resource person for the event. He is an Assistant Professor in the Department of Physics, Manipal Center for Natural Sciences, Manipal. Session started with a welcome by HOD. The resource person started the session with an introduction and explained the importance mission Aditya-L1. The resource person went on to explain various technological aspects of the space observatory and also showed some rare photos of Sun. The resource person also discussed some of the very interesting facts related to Astrophysics. From this session students got an awareness on Aditya-L1 and it also sparked a sense of curiosity among students in Astrophysics.

### Report:

Career Guidance session was conducted for the students of B.Sc(MEC)VI sem on June 3<sup>rd</sup> 2022 during the 1V<sup>th</sup> hour. Session was conducted by Prof. Roshini, it was an activity conducted by the Math  $\pi$  Rates club. The session was conducted in order to create awareness among the students about the different career opportunities and the various higher education courses like. Master of Science (MSc).Master of Business Administration (MBA); MBA in Data Science. MBA in IT. MBA in Hospital Management. etc. Master of Computer Applications

(MCA), Masters in Management (MIM), Masters in Social work (MSW), Masters in Data Science, Artificial Intelligence/Machine Learning, Bachelor of Education (B.Ed), Master of Education (Med), Technical Short-term Courses, that they could opt after B.Sc.

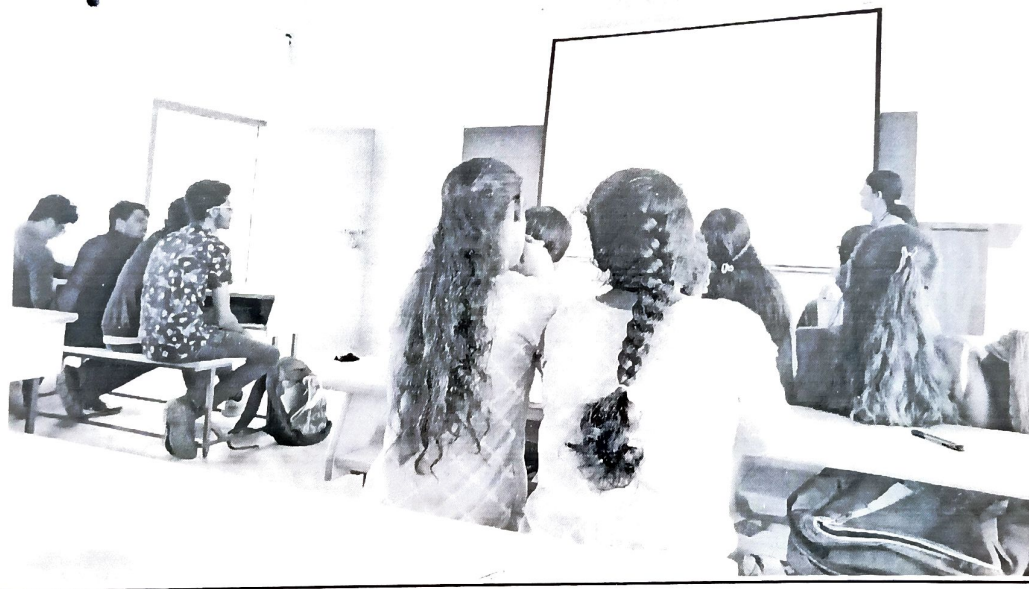

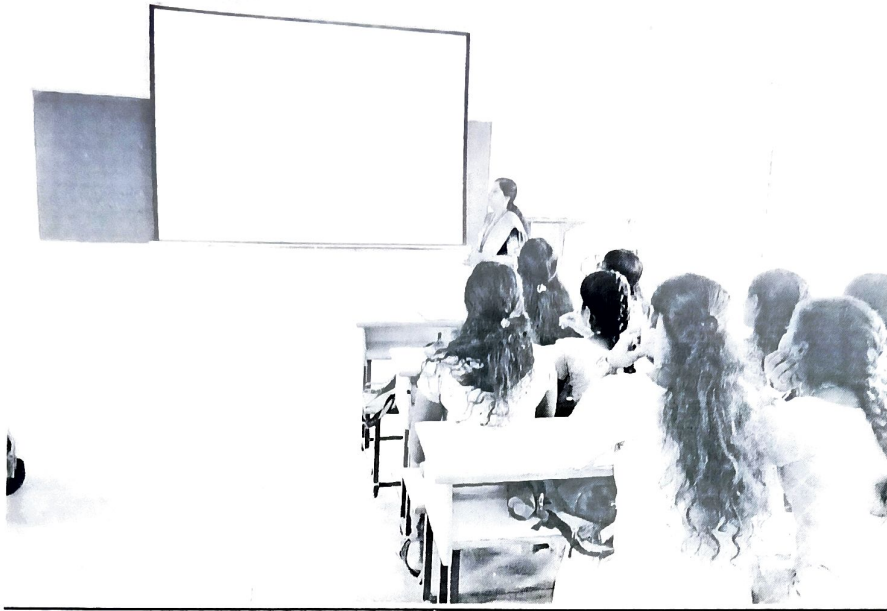

Students were also informed about the various competitive exams or Government Exams like UPSC, IAF, IFS exam, RBI exams, etc. so that they would be recruited into various government sectors.

Students were also told about the various job opportunities like, Research Scientist, Clinical Research Specialist, Lab Technician, Biochemist, Assistant Professor/Lecturer, Lab Assistant, IT/Technical Jobs etc.

At the end of the session students were given guidance on various career opportunities like actuary, financial risk analyst, accountant etc. available after doing higher education in Mathematics.

Resource Person(s) with qualification	Dr.NirmalaVaz and Dr. Raghu JyotiNivas College (Autonomous). Bangalore
---------------------------------------	--

Place of visit/ details of Industrial visit place (if applicable):	NA
Event Coordinator	Dr. Nebula Murukesh and Prof.Rashmi N

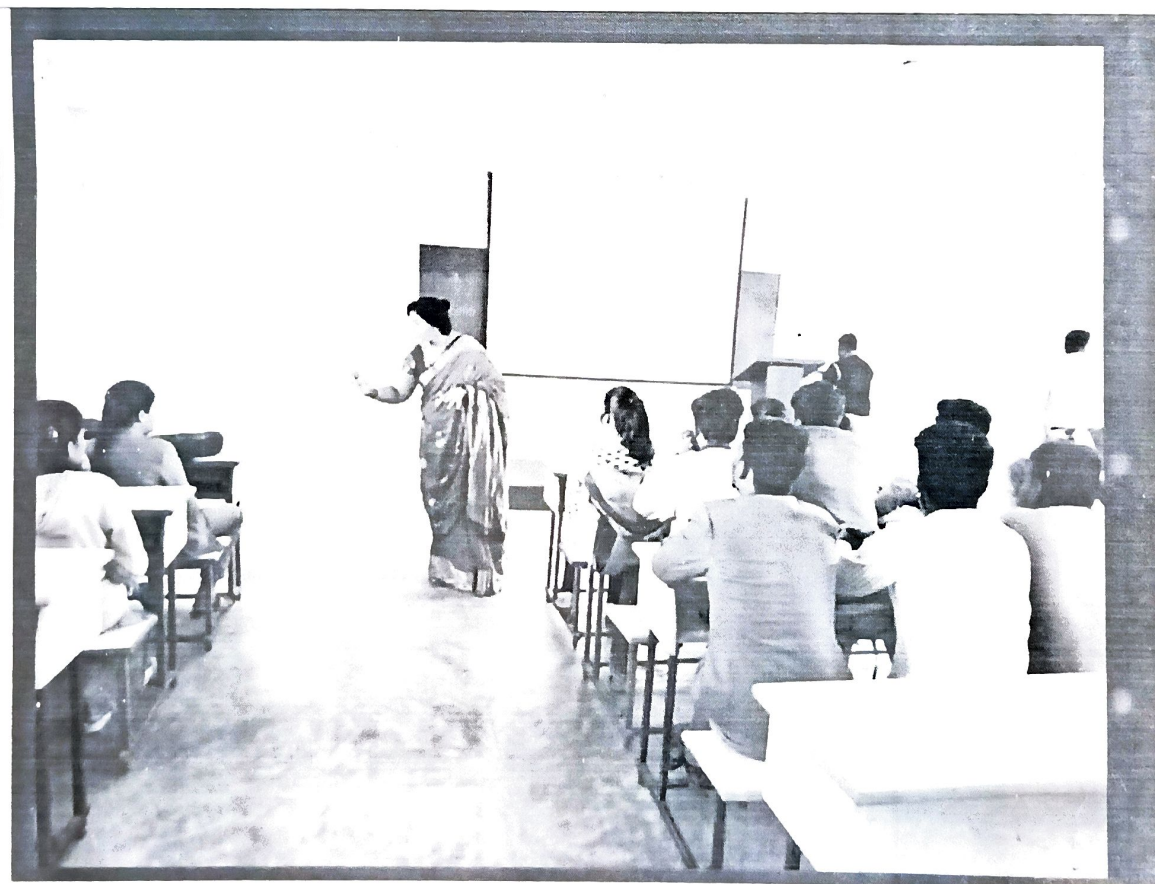

On 12th September 2022, Dr.Nirmala Vaz and Dr. Raghu from Jyoti Nivas College (Autonomous), Bangalore gave an orientation session to the final year B.Sc PCM students. Talked about the importance of pursuing M.Sc course and the various opportunities available for post graduate students in various pharmaceutical companies and chemical industries.. Also gave an insight to the postgraduate courses available in Jyoti Nivas College and the opportunity they are providing for doing internship with a good stipend. Highlighted about the opportunities their students got after finishing the post graduate courses from their institute.

The session was worthy and motivated the students. Also it gave good awareness to the students on the importance of higher education. The session concluded with a photo session with the Jyothi Nivas College Professors.
