Resource Person(s) with qualification	DHANUJAKSHI.A Department of Commerce
Event Coordinator	Prof. Dhanujakshi.A Prof. Pandikani.M

OBJECTIVE:

Preservation and Protection of Our Natural Resources – Conserving water can help preserve our natural resources. Conserving water means more water is available to serve additional water needs, as well as for wildlife and recreation.

An Essay writing on water conservation activity was organized by the Desalite Nature's Club. The activity was conducted on 23rd march 2022 in the class room. We asked the class coordinator to conduct this event in the club activity hour so all the class coordinator are agreed to conduct this essay on water conservation in their respective class room and students are encouraged to write essay on water

conservation and we got many ideas from students regarding how to save water and what are the steps to be taken for conserve water.

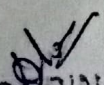

It is simply impossible to imagine human life without water, if there are no ample sources of water left then it would be a matter of great concern. Without water there will be no harvesting, no drinking water, no washing, cleaning and cooking as well. Hence it is very important to use our present water sources judiciously and try to save as much water as possible. It is very important to realize water conservation benefits and also to implement those in our day to day life. It is very important to realize the need for water conservation in the community as well as personal level.

Human demands are increasing day by day but the natural resources are in a limited quantity. Efforts have been made to collect water by building dams and reservoirs, practising rainwater harvesting, digging wells; some countries have also tried to recycle and desalinate salty water to make it fit for drinking or washing. Water conservation has become a major need of the hour.

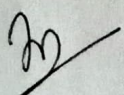

Outcome:-

Water conservation is a big thing and involves using water sources judiciously, but every little bit helps, every drop that you save counts. We must all make some little changes in our lifestyles that will change the course of our water. It takes just a small amount of motivation and willingness to bring about a change and importance of water conservation in the mind of students.

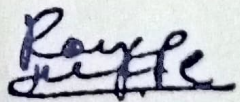

The event was organized and coordinated by the Desalite's Nature Club members under the guidance of Prof, Dhanujakshi.A Department of Commerce& Prof, Dr.Pandikani.M. Overall participation was good.
